PANEL TREES

Our Panel Trees have evolved with a new optimized design that enhances both durability, visual appeal and safety. These advancements not only ensure that the trees maintain their aesthetic charm throughout the season but also provide a robust and reliable option for commercial spaces seeking a festive centerpiece that combines beauty with practicality. Ask your Design Consultant for a more detailed summary of all Panel Tree improvements!

- UL approved, latest generation LED technology. Warm White for soft glow.
 - Branches are made of top quality, non-recycled PVC, to ensure rich colors, elasticity and longevity.
 - Perfect for any commercial setting (indoor or outdoor) or in a great room.
- Structural steel frames and branch panels are easy to assemble.

Only The Best For Your Business

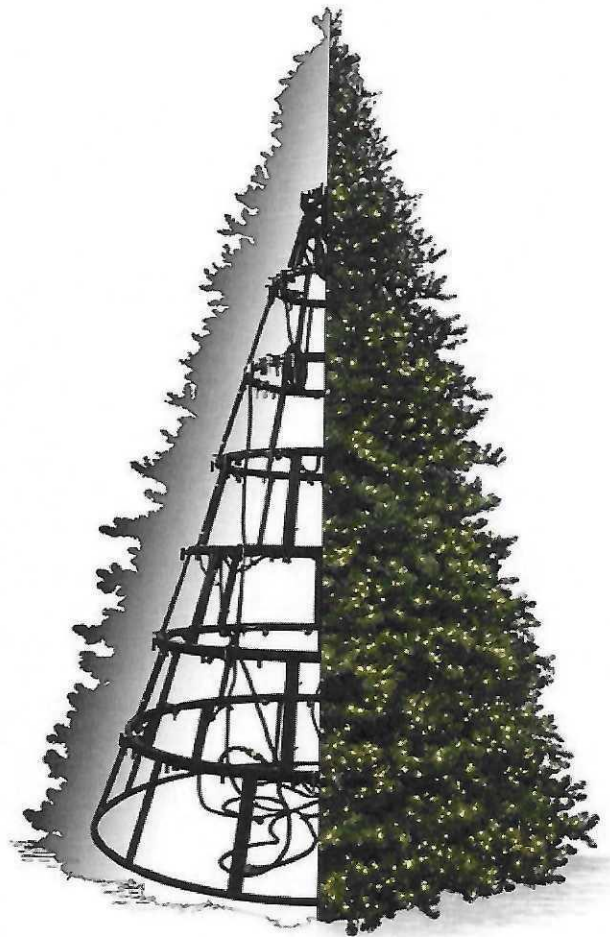

We set out to make the most realistic artificial Christmas trees using the finest materials. Our tree needles are made of plastic, but has anyone ever wondered what 'type' of plastic is used? Lesser brands use recycled plastics that cause your tree needles to become brittle over time. Treetime uses only top-quality, non-recycled plastics that ensure rich colors, elasticity, and longevity. This practice guarantees less artificial trees end up in a landfill and you get the most out of your investment for several years!

Engineering Standards That Shaped The Industry

When we started Treetime one of our biggest goals was to identify, reengineer, and innovate on the decades of manufacturing bad practices we've seen in the tree industry. We created lighter frames. We created structural and support enhancements. We created sections that were easier to assemble and take down. For nearly a decade our engineers have made so many meaningful contributions to tree design and manufacturing that we are now a tier above any other brand of Christmas tree in-store, or online.

Others Boast About "Best Lighting"— We Back It Up

We go through the painstaking process of making sure our lights match our reputation. We realize that many of our customers choose us because of our superior lighting. Our pre-lit trees are full of features, reliability, and last for years of trouble-free Christmas fun. We back that up with the best warranty in the industry for our Platinum line of trees with 2 seasons of lighting coverage, 3 seasons of structural coverage, and A+ customer service. That's better than any other brand online—period.

Internal steel frame built for indoor/outdoor use. Assembly required.

Dense from the base up through to the top, this Tower Tree has strong, medium green evergreen branches sweep gently outward and are capable of holding hundreds of ornaments without drooping. Whether fully dressed with a mix of ornamental treasures or with your favorite decorations, the Tower tree will be a classic centerpiece in any large Christmas display.

This durable industrial-strength product is designed with UV-resistant PVC needles (for longer color stability), our strong structural steel frame (easily assembled in modular levels), and attachable legs that can be staked to the ground for greater wind durability and safety in the installation.

This versatile product is available in 2' increments from 12' up to 30'. Start with the 12' section in the table above and add as many add-on sections as you require to achieve the target height.

Example: A 20 Tower Tree is made up of a 12' tree, a 14' add-on section, a 16' add-on section, an 18' add-on section, and a 20' add-on section.

Each add-on section includes a ring structure (wider than the next smaller one) to be placed under the smaller sections of above. Branch panels are the same for every add-on section. The bigger the add-on section, the more branch panels you get. Each branch panel hangs from a single hangar and has a single plug for simple assembly.
