Office of the Mayor

Proclamation

Borough of Tinton Falls County of Monmouth
November 10, 2026

Proclamation Recognizing Stroke Awareness

WHEREAS, stroke is a medical emergency that can affect people of any age and remains a leading cause of serious, long-term disability, creating profound personal, social, and economic consequences for individuals, families, caregivers, and communities; and

WHEREAS, rapid recognition and immediate emergency care can improve survival and recovery, because certain stroke treatments are most effective when delivered as quickly as possible after symptoms begin; and

WHEREAS, learning the warning signs of stroke and calling 911 without delay can help reduce preventable death and disability, making public education an essential part of community health and safety; and

WHEREAS, schools serving the Borough of Tinton Falls are encouraged to share age-appropriate Stroke Smart education with students, faculty, staff, and families so that more residents are prepared to recognize a possible stroke and act promptly; and

WHEREAS, healthcare providers, emergency medical services, fire and public safety personnel, pharmacies, senior-service organizations, municipal employees, and other health-focused partners are urged to promote stroke literacy among their employees, volunteers, patients, and the communities they serve; and

WHEREAS, local businesses, civic and service organizations, senior communities, faith-based organizations, and residents can strengthen this effort by sharing stroke-warning information and supporting the Stroke Smart message, "Spot a Stroke, Stop a Stroke, Save a Life"; and

WHEREAS, the Borough of Tinton Falls seeks to build a more informed and responsive community in which residents know that every minute matters and understand the importance of contacting emergency services immediately when stroke is suspected;

NOW, THEREFORE, on behalf of myself and Borough Council, do hereby proclaim the Borough's support for Stroke Smart awareness and encourage all residents, schools, organizations, businesses, healthcare partners, and municipal personnel to learn the warning signs of stroke, share this life-saving knowledge, and call 911 immediately whenever a stroke is suspected.
