Sec. 46-55. Separate Metering of Irrigation Systems.

- (a) Upon approval of proper plans and specifications by the City, property owners may request and have set on public property or in an easement as set forth in this section, a water meter which will be used solely for the purpose of metering water for irrigation systems and cooling towers. The volume of water which goes through such meter shall be charged the same rate as for potable water but shall not be subject to the sewer charge of the city.
- (b) All separately metered irrigation systems and cooling tower systems shall be tied directly into a City main and shall be equipped with such valves and apparatuses as shall be required in the sole discretion of the city. All such systems shall comply with the laws of the state regulating irrigation and cooling tower systems, which at this time consist primarily of the Irrigation Act, V.T.C.A., Water Code Ch. 11.
- (c) The second meter must be installed on public property or in an easement granted to the City, thereby granting the City free access thereto. If a second meter for irrigation purposes or cooling towers is requested, in addition to an existing meter, the customer shall pay the applicable capital recovery fee (impact fee). Such fees shall be determined by the size of the water meter to be installed for the requested service. ~~and the existing meter has already been assessed an impact fee or a capital recovery fee, no impact fee shall be payable for the setting of the second meter.~~ All other costs involved with the setting of such meter, including tap fees charged by the City, shall be the same as for the setting of a new meter under any other applicable City codes.
- (d) The City shall be responsible for reading both meters when there is a dual metering system, and the utility department will, in its sole discretion, determine the amount of water being used for irrigation and for cooling towers and the amount of water being used for domestic purposes by the property owner and will, therefore, in its sole discretion, determine the amount of water which is subject only to the water charge and the amount that will be used to determine the amount of sewer charges due from the property owner.
