My insurance Allstate for homeowners [REDACTED] Skislope has changed my classification to a 10 ISO because the closest fire station full time is 5.6 miles away which is an increased risk even though the fire hydrant closest is less than 100 feet away. There is a fire station 3.6 miles away on Northwoods loop but it is not staffed full time-why not as it has a fire engine? There rules for safety are full time less than 5 miles away for fire stations. Even though up here we are considered extreme risk they have a separate risk company that gave Tahoe Donner a risk rating of 4 which is good due to the HOA mitigation efforts. Can we possibly man the Northwoods fire station now to prevent disaster? Thanks Dr. John Morgan

Truckee Fire,

Greetings. I recently attended the latest wildfire town meeting state. The CalFire report was very informative for me as a homeowner. It has left me with some questions:

How will town residents go about getting in line for the dead tree removal service that was mentioned? This plan seems brilliant.

Second, and far more complex in nature- I would like to know how to get involved with the egress planning for single entry/exit neighborhoods. What data and considerations will be factored into the accommodation of the state mandate to provide for secondary access points?

As I believe the recent past has taught us all, we must take aggressive **action** to reduce fuel sources and prepare for the day that Truckee is threatened like Meyers, Palisades or Paradise. I know I am just one voice, but as a young person invested in this community, I want to know what (if any) action myself and my peers can engage with on this critical issue. I have seen up close how enthusiastic and capable our community is when it comes to helping out with programs like Truckee Nordic Sar and TAMBA. Is the town interesting in community action to spread information and/or take action?

Respectfully,

Schuyler Collett
