

## **PUBLIC ENTITY CLAIM –TOWN OF TRUCKEE**

**Name of Claimant(s):** Christy Arsenith, Merriann Cassidy, George Joseph Arsenith Jr.

**Telephone Number:** (may be contacted through counsel – Benjamin H. Adams (360) 540-1877

**Mailing Address:** (may be contacted through counsel – Benjamin H. Adams) 55 Harrison St.,  
Suite 400, Oakland, CA 94607, United States

### **Claim information:**

Claimants believe George Joseph Arsenith (DOB 6/17/1949) may have been exposed to asbestos cement pipe in Truckee, California, before dying of mesothelioma on January 11, 2025.

Mesothelioma is a fatal and incurable cancer caused only by exposure to asbestos. Exposure to all types of asbestos increases an individual's risk of developing mesothelioma and there is no safe level of exposure to asbestos for the disease mesothelioma. Mr. Arsenith is survived by his widow, Christy Arsenith, and his two children, Merriann Cassidy and George Joseph Arsenith Jr.

The Town of Truckee's negligence, including but not limited to its negligent construction, supervision, hiring and specification of deadly asbestos-containing materials, including asbestos-containing transite pipe may have exposed Mr. Arsenith to asbestos through work he performed, work performed in close proximity to him, and work performed by his father George Macedo Arsenith Sr. (DOB 7/29/18). Further, Mr. Arsenith may have been exposed to asbestos as the result of unsafe conditions on the Town of Truckee's property.

This exposure includes but is not limited to construction projects while Mr. Arsenith or his father were employed by T & S Construction, McGuire & Hester, and Granite Construction from the 1950s to 2000s involving installation and/or removal of asbestos-containing water, sewage, or drain pipe, as well as work at water treatment facilities and/or pumping stations. This included, but was not limited to, construction projects detailed in the job list attached hereto as **Exhibit A**.

As a result of his mesothelioma, Mr. Arsenith died prematurely and suffered immensely over the last weeks and months of his life, sustaining over \$100,000,000 in noneconomic damages. These damages include immense physical pain, mental suffering, loss of enjoyment of life, disfigurement, physical impairment, inconvenience, grief, anxiety, humiliation and emotional distress. Further, he sustained approximately \$5,000,000 in economic damages including, but not limited to lost household services, social security and retirement benefits and medical and funeral costs.

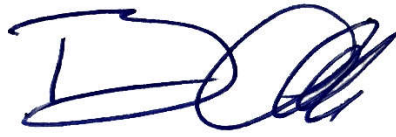

His wife Christy Arsenith also sustained significant loss of consortium damages for the loss of George's love, companionship, comfort, care, assistance, protection, affection, society, moral support and physical relations, totaling over \$50,000,000.

Finally, Mr. Arsenith's children, Merriann Cassidy and George Joseph "Joe" Arsenith Jr., have suffered losses due to the death of their father, totaling over \$25,000,000 each.

**Name of Authorized Representative Submitting Claim:** Benjamin H. Adams, Attorney.

**Telephone Number:** (may be contacted through counsel – Benjamin H. Adams (360) 540-1877

**Mailing Address:** (may be contacted through counsel – Benjamin H. Adams) 55 Harrison St.,  
Suite 400, Oakland, CA 94607, United States

Intraop:	Darrow, Morgan Angus, MD		

**FINAL DIAGNOSIS**

- A. PLEURA, LEFT, NODULE (BIOPSY):**  
- Malignant mesothelioma- biphasic pattern (sarcomatoid component approximately 80% with focal heterologous element consistent with osteosarcoma (atleast 5%)).
- B. PLEURA, LEFT, BIOPSY 2 (BIOPSY):**  
- Malignant mesothelioma- predominantly epithelioid pattern.
- C. PLEURA, LEFT, BIOPSY 3 (BIOPSY):**  
- Malignant mesothelioma- predominantly epithelioid pattern.

REVIEW/CONCUR: This case (or selected slides) has been reviewed in intradepartmental consultation (MD).

Stain	Interpretation	Comment
CEA-MONO	Negative	
D2-40	Positive	
CALRETININ	Positive	
EPITHELIAL ANTIGEN (BER-EP4)	Negative	
SATB2	Positive in osteosarcomatous component	

INTERPRETATION: The above Immunostains support the above diagnostic impression

Stains performed for diagnostic and/or therapeutic clarification. They were ordered after examination of H&E stained sections. All controls performed appropriately.

The Class I analyte-specific reagents used in some of the Immunohistochemistry tests reported were developed and their performance characteristics determined by UC Davis Health System, Department of Pathology and Laboratory Medicine. They have not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary.

## GROSS DESCRIPTION

A. PLEURA, LEFT, Left Pleural Nodule - Received without fixative, labeled with the patient's name, medical record number, and designated "Left Pleural Nodule ", is a 3.5 x 1.6 x 0.2 cm segment of pleura. There is a 0.8 x 0.6 x 0.5 cm papillary pale-tan polypoid lesion on the pleural surface. The base margin is inked blue. A representative section of lesion to pleura is submitted for frozen section analysis. The frozen section remnant is submitted as per cassette summary. The specimen is entirely submitted.

Gross photographs are taken.

Summary of sections:

A1: Lesion to pleura (frozen section remnant)  
A2: Remainder of lesion to pleura  
A3-4: Remainder of specimen  
dwp

B. PLEURA, LEFT, Left Pleural biopsy 2 - Received in formalin, labeled with the patient's name, medical record number, and designated on the requisition as, "Left Pleural biopsy 2" is a 4.6 x 2.5 x 0.2 cm segment of pleura. The base margin is inked blue, the specimen is sectioned and entirely submitted in cassettes B1-3.

C. PLEURA, LEFT, Left Pleural biopsy 3 - Received in formalin, labeled with the patient's name, medical record number, and designated on the requisition as, "Left Pleural biopsy 3" is a 4.1 x 3.7 x 0.5 cm segment of pleura. The pleural surface is roughened and pink. The base margin is inked blue. The specimen is sectioned and entirely submitted in cassettes C1-4.  
dwp

MICROSCOPIC DESCRIPTION

Unless designated as "gross only", slides were examined microscopically and the diagnosis for each specimen incorporates the pathologist's interpretation.

IMMUNOHISTOCHEMISTRY/SPECIAL STAIN RESULTS

The following stains were performed and interpreted at UC Davis Medical Center on block A1, B1 and C1:

IHC Stains		
Stain	Interpretation	Comment
CALRETININ	Negative	
SATB-2	Negative (A1)	
SPECIAL STAINS		
Stain	Interpretation	Comment
AFB	Negative for acid fast bacilli	
GMS FUNGUS	Negative for fungal organisms	

INTERPRETATION: The above Immunostains support the above diagnostic impression

Stains performed for diagnostic and/or therapeutic clarification. They were ordered after examination of H&E stained sections. All controls performed appropriately.

The Class I analyte-specific reagents used in some of the Immunohistochemistry tests reported were developed and their performance characteristics determined by UC Davis Health System, Department of Pathology and Laboratory Medicine. They have not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary.

GROSS DESCRIPTION

A. LYMPH NODE, Station 7 - Received in formalin, labeled with the patient's name, medical record number, and designated on the requisition as, "LYMPH NODE, Station 7" is a 1 x 0.7 x 0.3 cm aggregate of pink and anthracotic soft tissue. The specimen is submitted in cassette A1.

B. LYMPH NODE, STATION NO. 4 LEFT, Station 4L - Received in formalin, labeled with the patient's name, medical record number, and designated on the requisition as, "LYMPH NODE, STATION NO. 4 LEFT, Station 4L" is a 2 x 1.8 x 0.4 cm aggregate of tan and anthracotic soft tissue. The specimen is submitted in cassette B1.

C.
