Title: **Draft Plan Elements**

---

**Recommended Action:** That the River Revitalization Steering Committee participate in a facilitated discussion and provide input regarding formation of a sub-committee to review and refine Draft Plan Elements. Vote to form a subcommittee, including selection of committee members.

**Discussion:**

A facilitated discussion will be held on the recommended approach to distill the content of previous R2SC visioning sessions and discussions about land use into a draft plan for R2SC review:

- o Identify interest in participating in a subcommittee to review a draft of the distillation of draft plan elements
- o Subcommittee recommended to meet March 4 and review draft plan and provide input to consultant (R2SC wouldn't meet in March)
- o Revised draft plan brought to R2SC in April for discussion, subcommittee to meet mid-April to discuss addressing R2SC feedback
- o Consultant to make revisions and bring back to R2SC in May
- o In parallel, the work on the catalyst projects informs the draft plan and the framework elements of the draft plan informs the advancement of the catalyst projects
