PLANNING COMMISSION RESOLUTION 2024-08

A RESOLUTION OF THE TOWN OF TRUCKEE PLANNING COMMISSION APPROVING APPLICATION 2021-00000060/DP (SILVER CREEK ESTATES)

WHEREAS, the Town of Truckee Planning Commission approved a Development Permit, Planned Development, Use Permit, and Tentative Map for a 167-unit residential subdivision (Winter Creek) on APN 19-450-61; and

WHEREAS, the Winter Creek Final Map created the subject parcel and reserved it for future development; and

WHEREAS, the Town has received an application requesting approval of a Development Permit for the construction of 40 multifamily residential units located on Winter Creek Loop - No Address Assigned (APN 019-820-001-000) in the RM (Residential Multifamily) zoning district. Development Permit approval is required for permitted uses with more than 7,500 square feet of floor area; and

WHEREAS, the Planning Commission is responsible for the review and consideration of Development Permits; and

WHEREAS, a public notice was published in the *Sierra Sun* and mailed to property owners within 500 feet of the project site informing the public of the date, time, and location of the public hearing for the consideration of the approval or denial of the Development Permit; and

WHEREAS, the Planning Commission held a public hearing on the matter at its regularly scheduled Planning Commission meeting beginning and ending on May 21, 2024 and considered all information, and public comment related thereto; and

NOW THEREFORE BE IT RESOLVED, the Planning Commission hereby takes the following actions on Application 2021-00000060/DP (Silver Creek Estates):

1. Determines the project to be exempt from the provisions of CEQA per the Class 32 exemption for In-Fill Development Projects (Section 15332 of the CEQA Guidelines); and

2. Approves a Development Permit and the conditions of approval set forth in Exhibit C (Conditions of Approval) attached hereto and incorporated herein.

BE IT FURTHER RESOLVED, the Planning Commission adopts the findings set forth in Exhibit D (Findings), in support of approval of the Development Permit.

The foregoing Resolution was introduced by _____ and seconded by _____ at a Regular Meeting of the Truckee Planning Commission held on the 21st day of May 2024 and adopted by the following vote:

AYES:

NOES:

ABSENT:

_____
Mitch Clarin, Chair
Town of Truckee Planning Commission

ATTEST:

_____
Kayley Metroka, Administrative Technician

GENERAL NOTES

1. THESE GENERAL NOTES PERTAIN TO WORK DESCRIBED ON ALL CONTRACT DOCUMENTS.
2. THE CONTRACT DOCUMENTS CONSIST OF THE OWNER CONTRACTOR AGREEMENT, THE CONDITIONS OF CONTRACT (GENERAL, SUPPLEMENTARY, AND OTHER CONDITIONS), THE DRAWINGS, THE SPECIFICATIONS, AND ALL ADDENDA ISSUED PRIOR TO AND ALL MODIFICATIONS ISSUED AFTER EXECUTION OF THE CONTRACT.
3. FORMGREY STUDIO, LLC IS THE AUTHOR OF THESE PLANS AND CLAIMS A COPYRIGHT IN THESE PLANS AND THE DESIGNS CONTAINED IN THESE PLANS. THIS CLAIM IS MADE UNDER TITLE 17 OF THE UNITED STATES CODE AND ALL APPLICABLE TREATIES AND FOREIGN LAWS. THESE COPYRIGHTED DRAWING FILES ARE TO BE USED FOR REFERENCE ONLY. FORMGREY STUDIO, LLC WILL TAKE NO RESPONSIBILITY FOR ANY CHANGES MADE TO THESE DOCUMENTS BY ANOTHER PARTY AND NO LICENSE IS GIVEN FOR TRANSFER OF THESE COPYRIGHTS TO ANOTHER PARTY.
4. THE WORK COMPRISES THE COMPLETED CONSTRUCTION REQUIRED BY THE CONTRACT DOCUMENTS AND INCLUDES ALL LABOR NECESSARY TO PRODUCE SUCH CONSTRUCTION, AND ALL MATERIALS AND EQUIPMENT INCORPORATED OR TO BE INCORPORATED IN SUCH CONSTRUCTION.
5. SHOP DRAWINGS, PRODUCT DATA AND SAMPLES ARE NOT A PART OF THE CONTRACT DOCUMENTS. THE ARCHITECT WILL REVIEW THEM, BUT ONLY FOR CONFORMANCE WITH THE DESIGN CONCEPT OF THE WORK AND WITH THE INFORMATION GIVEN IN THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL NOT BE RELIEVED OF RESPONSIBILITY FOR ANY DEVIATION FROM THE REQUIREMENTS OF THE CONTRACT DOCUMENTS BY THE ARCHITECTS REVIEW OF SHOP DRAWINGS, PRODUCT DATA OR SAMPLES.
6. THE CONTRACTOR SHALL CAREFULLY STUDY AND COMPARE THE CONTRACT DOCUMENTS AND SHALL AT ONCE REPORT TO THE ARCHITECT ANY ERROR, INCONSISTENCY OR OMISSIONS HE MAY DISCOVER. THE CONTRACTOR SHALL PERFORM NO PORTION OF THE WORK AT ANY TIME WITHOUT CONTRACT DOCUMENTS OR, WHERE REQUIRED, APPROVED SHOP DRAWINGS, PRODUCT DATA OR SAMPLES FOR SUCH PORTION OF THE WORK.
7. ALL WORK IS TO CONFORM WITH THE CONTRACT DOCUMENTS. DRAWINGS ARE NOT TO BE SCALED FOR INFORMATION IF UNABLE TO LOCATE DIMENSIONS FOR ANY ITEM OF WORK, CONSULT WITH THE ARCHITECT BEFORE PROCEEDING WITH CONSTRUCTION.
8. IN THE EVENT CERTAIN FEATURES OF THE CONSTRUCTION ARE NOT FULLY SHOWN ON THE CONTRACT DOCUMENTS, THEN THEIR CONSTRUCTION SHALL BE OF THE SAME CHARACTER AS FOR SIMILAR CONDITIONS THAT ARE SHOWN OR CALLED FOR AND SHALL BE REVIEWED BY THE ARCHITECT.
9. ALL WORK SHALL BE PERFORMED WITHIN STRICT CONFORMANCE TO THE MINIMUM STANDARDS OF THE CURRENT EDITION OF THE INTERNATIONAL BUILDING CODE AND ALL APPLICABLE NATIONAL, STATE, AND LOCAL LAWS, REGULATIONS AND ORDINANCES.
10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE GENERAL SAFETY DURING CONSTRUCTION, AND ALL WORK SHALL CONFORM TO PERTINENT SAFETY REGULATIONS.
11. THE CONTRACTOR SHALL COORDINATE LOCATIONS OF ANY AND ALL MECHANICAL, TELEPHONE, ELECTRICAL, LIGHTING AND PLUMBING INCLUDING ALL PIPING, DUCT WORK AND CONDUIT. COORDINATE ALL REQUIRED CLEARANCES FOR INSTALLATION AND MAINTENANCE OF THE ABOVE EQUIPMENT.
12. THE CONTRACTOR SHALL SUPERVISE AND DIRECT THE WORK USING THEIR BEST SKILL AND ATTENTION, THEY SHALL BE SOLELY RESPONSIBLE FOR ALL CONSTRUCTION MEANS, METHODS, TECHNIQUES, SEQUENCES AND PROCEDURES AND FOR COORDINATING ALL PORTIONS OF THE WORK UNDER THE CONTRACT.
13. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE ACTS AND OMISSIONS OF THEIR EMPLOYEES, SUBCONTRACTORS AND THEIR AGENTS AND EMPLOYEES, AND OTHER PERSONS PERFORMING ANY WORK UNDER A CONTRACT WITH THE CONTRACTOR.
14. THE CONTRACTOR SHALL PURSUE WORK IN A CONTINUOUS AND DILIGENT MANNER TO INSURE TIMELY COMPLETION OF THE PROJECT.
15. THE CONTRACTOR AT ALL TIMES SHALL KEEP THE PREMISES FREE FROM ACCUMULATION OF WASTE MATERIALS OR RUBBISH CAUSED BY THEIR OPERATIONS. AT THE COMPLETION OF THE WORK, THEY SHALL REMOVE ALL THEIR WASTE MATERIALS AND RUBBISH FROM AND ABOUT THE PROJECT AS WELL AS ALL THEIR TOOLS, CONSTRUCTION EQUIPMENT, MACHINERY, AND SURPLUS MATERIALS.
16. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE LOCATION AND/OR PROTECTION OF ALL EXISTING AND PROPOSED PIPING, UTILITIES, STRUCTURES, ADJACENT STREETS, AND IMPROVEMENTS DURING THE PERIOD OF CONSTRUCTION.
17. UNLESS OTHERWISE PROVIDED IN THE CONTRACT DOCUMENTS, THE CONTRACTOR SHALL PROVIDE AND PAY FOR ALL LABOR, MATERIAL, EQUIPMENT, TOOLS, CONSTRUCTION EQUIPMENT, MACHINERY, WATER, HEAT, UTILITIES, TRANSPORTATION, AND OTHER FACILITIES AND SERVICES NECESSARY FOR THE PROPER EXECUTION AND COMPLETION OF THE WORK.
18. THE CONTRACTOR SHALL SUBMIT WEEKLY JOB STATUS REPORTS TO THE ARCHITECT. THE REPORT SHALL STATE ACTUAL PROGRESS OF THE JOB AND LIST ANY CHANGES OR CONDITIONS WITHIN THE SCOPE OF THE CONTRACT DOCUMENTS AFFECTING THE JOB PROGRESS.
19. WHERE CONFLICTS OCCUR, COORDINATE THE LAYOUT AND EXACT LOCATION OF ALL PARTITIONS, DOORS, TELEPHONES AND ELECTRICAL/COMMUNICATION OUTLETS AND SWITCHES WITH ARCHITECT IN THE FIELD BEFORE PROCEEDING WITH CONSTRUCTION.
20. WHERE CONFLICT IS ENCOUNTERED BETWEEN THE CONTRACT DOCUMENTS THAT WILL MATERIALLY AFFECT THE QUALITY OR EXTENT OF THE WORK, SUCH CONFLICT SHALL BE RESOLVED TO THE SATISFACTION OF THE ARCHITECT BEFORE THE AFFECTED ITEMS AND/OR MATERIALS ARE PURCHASED, FABRICATED AND/OR INSTALLED.
21. WHERE PRE-MANUFACTURED OR PRE-FABRICATED ITEMS AND/OR MATERIALS ARE TO BE INSTALLED - THE CONTRACTOR SHALL VERIFY ROUGH OR FINISHED DIMENSIONS IN THE FIELD PRIOR TO PURCHASE OR FABRICATION.
22. THE CONTRACTOR SHALL GUARANTEE ALL WORK AND MATERIALS TO BE FREE FROM DEFECTS FOR A MINIMUM OF ONE YEAR FROM DATE OF FINAL ACCEPTANCE, AND PROMPTLY REMEDY SUCH DEFECTS AND ANY SUBSEQUENT DAMAGE CAUSED BY THE DEFECTS OR REPAIR THEREOF, AT NO EXPENSE TO THE OWNER. GUARANTEE PERIODS OF GREATER THAN ONE YEAR MAY BE REQUIRED AND CONTAINED WITHIN THE CONTRACT DOCUMENTS.
23. UNLESS OTHERWISE PROVIDED IN THE CONTRACT DOCUMENTS THE CONTRACTOR SHALL SECURE AND PAY FOR THE BUILDING PERMIT AND FOR ALL OTHER PERMITS AND GOVERNMENTAL FEES, LICENSES AND INSPECTIONS NECESSARY FOR THE PROPER EXECUTION AND COMPLETION OF THE WORK.
24. WHERE ANY ITEM AND/OR MATERIAL IS INDICATED IN THE CONTRACT DOCUMENTS, AND NOT NECESSARILY DETAILED IN EACH SPECIFIC CASE, BUT IS REQUIRED FOR A COMPLETE AND PROFESSIONAL INSTALLATION - SUCH ITEM AND/OR MATERIAL SHALL BE PROVIDED AS IF SHOWN AND DETAILED IN FULL. PROVIDE MEANS TO FURNISH AND INSTALL.

UTILITY NOTES:

MAINTAIN MINIMUM SEPARATION FOR ALL UTILITIES PER UTILITY COMPANY STANDARD SPECIFICATIONS AND TDPUD STD. DWG. NO. UT-S3.

CONTRACTOR TO POTHOLE ALL EXISTING UTILITIES PRIOR TO CONSTRUCTION AND NOTIFY ENGINEER IF ACTUAL LOCATION AND DEPTH DIFFERS SIGNIFICANTLY FROM LOCATION AND DEPTH SHOWN ON PLANS.

CONTRACTOR SHALL COORDINATE WITH UTILITY COMPANIES TO OBTAIN FINAL CONSTRUCTION DRAWINGS AND STANDARD SPECIFICATIONS. ALL UNDERGROUND CONDUIT AND PIPING TO BE INSTALLED IN ACCORDANCE WITH THE LATEST ADOPTED VERSION OF THE CALIFORNIA PLUMBING CODE AS WELL AS PLANS/STANDARDS AND DETAILS OF THE LOCAL UTILITY COMPANY HAVING JURISDICTION.

NATURAL GAS PIPING TO THE GAS METER SHALL BE INSTALLED BY SW GAS (ALL TRENCHING AND BACKFILL BY CONTRACTOR). NATURAL GAS PIPING BEYOND THE METER SHALL BE INSTALLED BY THE CONTRACTOR PER THE APPROVED PLUMBING PLAN. ALL UNDERGROUND PIPE TO BE INSTALLED WITH TRACER WIRE PLACED 12" ABOVE PIPE WITH YELLOW WARNING TAPE LABELED "DANGER GAS PIPE".

WATER INSTALLATION & NOTES:

WHERE WATERLINE INTERSECTS ABOVE SD OR SEWER LINE CONTRACTOR SHALL INSTALL A FULL STICK OF WATER PIPE SHOULD BE CENTERED ON THE STORM DRAIN OR SEWER, WHEN THE WATER PIPE IS BELOW THE STORM DRAIN OR SEWER.

MAINTAIN MINIMUM SEPARATION FOR ALL UTILITIES PER TDPUD STD. DWG. NO. W-44.2. PROVIDE 24" MINIMUM CLEARANCE FROM WATER FACILITIES TO ANY OTHER UTILITY. THIS INCLUDES ALL ELECTRIC, GAS, TELEPHONE AND CABLE FACILITIES, ABOVE OR BELOW GROUND.

SEE W-6.3 AND W-8.2 FOR THRUST BLOCK AND MECHANICAL PIPE RESTRAINT NOTES.

CONTRACTOR SHALL ADJUST ALL (E) UTILITY BOXES, VAULTS AND MANHOLES WHICH OCCUR WITHIN NEW PAVEMENT TO 1/2" TO 1/4" BELOW FINISH GRADE. CONTRACTOR SHALL UPGRADE ALL BOXES, VAULTS AND LIDS TO H-20 TRAFFIC RATED WHERE BOXES VAULTS AND LIDS OCCUR WITHIN VEHICLE TRAFFIC AREAS.

SEE LANDSCAPE PLANS FOR IRRIGATION PIPE, VALVES AND SLEEVE LOCATIONS.

SEWER NOTES:

ALL SEWER INSTALLATION SHALL MEET OR EXCEED DISTRICT CODE ORDINANCE 1-2021.

SEWER LATERAL NOTE: ALL 4" SEWER LATERALS SHALL BE CONSTRUCTED 2% MIN SLOPE PER FIG. 8 SHT. C8.5. ONCE BEYOND CROSSING WITH OTHER UTILITIES SUCH AS WATER AND STORM DRAIN LATERALS CAN BE STEEPENED TO HAVE CLEANOUTS TO GRADE AND LATERAL AT 48" MIN DEPTH TYPICAL ALL LOTS.

ALL SEWER LATERALS 2% MIN TO MANHOLE OR WYE. PER TSD FIG 8 NOTE:

WHERE SEWER LATERALS CROSS WATER LINE MAINTAIN 2% OFF OF WYE AND RISE AFTER CROSSING

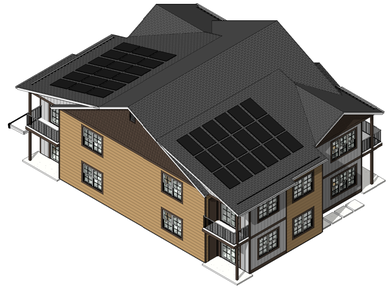
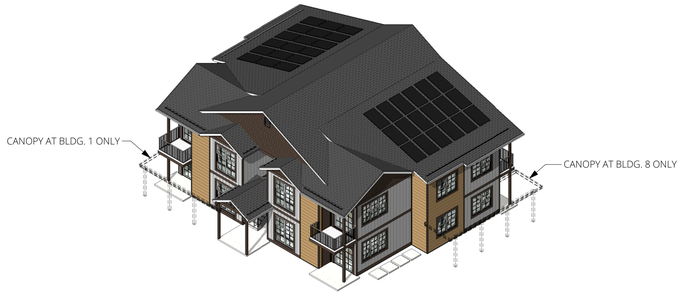
ROOF PLAN - BUILDINGS 1 and 8

1/8" = 1'-0"



ISOMETRIC - NORTHWEST VIEW



ISOMETRIC - SOUTHEAST VIEW

FLOOR PLAN NOTES

1. ALL DIMENSIONS ARE FROM FACE-OF-STUD TO FACE-OF-STUD, AND FACE-OF-BLOCK TO FACE-OF-BLOCK (U.N.O.)
2. ALL LUMBER TO BE FOREST STEWARDSHIP COUNCIL CERTIFIED DOUGLAS FIR#2 OR BETTER (U.N.O.)
3. ALL FINISH MATERIALS NOT SPECIFIED TO BE COORDINATED WITH OWNER AND/OR ARCHITECT.
4. PROVIDE SOLID BLOCKING BEHIND ALL FIXTURES AND WALL MOUNTED ACCESSORIES.
5. ANY WALLS THAT ARE MODIFIED, REPLACE GYP. BD. W/ 5/8" TYPE 'X' GYP. BD.
6. WHERE (E) STUD WIDTHS VARY FROM NEW WALL TYPE STUD WIDTH, MATCH (E) STUD WIDTH.
7. PROVIDE WALL & FLOOR STOPS AT DOORS AS REQUIRED.
8. (E) WALLS REQUIRING OPENINGS TO BE INFILLED SHALL MATCH (E) CONSTRUCTION & FIRE RATING.
9. ALL PLYWOOD SHEATHING SHALL BE FOREST STEWARDSHIP COUNCIL CERTIFIED (U.N.O.).

ROOF NOTES

1. ROOF MATERIAL SHALL BE **<METAL ROOFING> <ASPHALT SHINGLES>** OVER ONE LAYER 30 # ASPHALT FELT PAPER AND SOLID ROOF SHEATHING. REFER TO STRUCTURAL DRAWINGS FOR SHEATHING INFORMATION. THE ROOF SHALL CONFORM TO THE REQUIREMENTS OF A **<CLASS "C" OR BETTER ROOFING ASSEMBLY> <CLASS "A" ROOFING ASSEMBLY>**. ALL NON-MEMBRANE ROOFING SYSTEMS AT LESS THAN 2:12 PITCH SHALL REQUIRE ICE SHIELD UNDERLAYMENT.
2. ROOF PITCH SHALL BE 4:12, OR UNLESS NOTED OTHERWISE ON ROOF PLAN.
3. ROOF OVERHANGS SHALL BE AS DIMENSIONED ON ROOF PLAN.
4. ALL VENT PIPES AND CAPS SHALL BE PAINTED TO MATCH COLOR OF ROOF MATERIAL AND SHALL BE HIDDEN BEHIND RIDGES WHERE POSSIBLE.
5. PROVIDE ICE SHIELD PER **<IBC 1507.1.2> <IRC R905.1.2>** AT ALL EAVES.
6. PROVIDE ATTIC VENTILATION @ 1 SQ. FT. PER 150 SQ. FT. OF ATTIC AREA BY MEANS OF EQUALLY SPACED EAVE VENTS WITH 1/4" X 1/4" GALVANIZED MESH SCREEN AND PREFABRICATED GABLE END ATTIC VENTS AS INDICATED ON EXTERIOR ELEVATIONS.

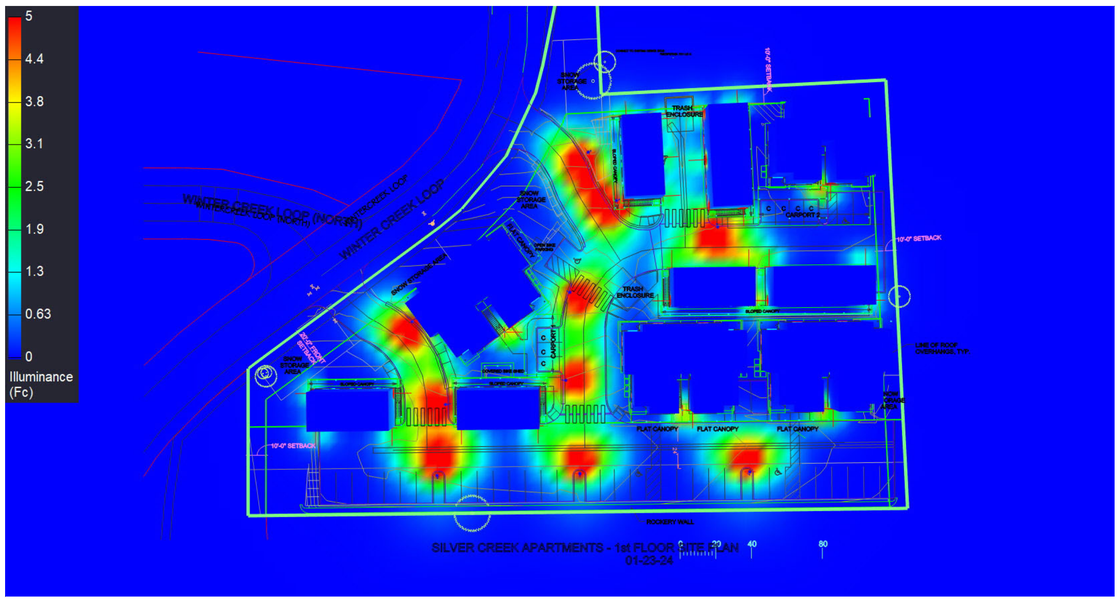
Scale: 1 inch= 40 Ft.



Note on this Design:
This report makes no representations in regard to Lighting Design or Specification, rather it attempts to accurately reflect the photometric results of a design,as approved by others.

Note on these Photometric Calculations:
This analysis is a mathematical model and can be only as accurate as is permitted by the third-party software and the IES standards used. All digital CAD data appear to be accurate, however, this apparent accuracy is an artifact of the techniques used to generate it and is in no way intended to imply accuracy in the real world.

There are many factors that will impact the actual performance of Lighting in the constructed space, including: the accuracy of the original source (.ies) files supplied by the manufacturer, input voltage ballast variances, actual finish values in the constructed environment, manufacturing variations in both the source (lamp) and the luminaire, final luminaire placement, obstructions, and installation quality. Further, field measurement itself is subject to errors arising from measuring methods and/or technology selected, and the knowledge/ability of the measuring party. While the creator of this lighting study makes every effort to ensure accuracy, they cannot be held liable for any errors. The recipient of this lighting study understands and accepts that the likelihood of scaling error increases when no .DWG file or other properly-dimensioned drawing is provided to the designer.

Reflective Values have a significant effect on light levels, the end-user of the document should confirm these values before accepting the results of any photometric report. The managing contractor/ architect/engineer is responsible for ensuring compliance to all relevant lighting ordinance(s) and energy codes required on this project.

LIGHTING DETAILS:

PROJECT NAME: _____ CATALOG #: _____

NOTES: _____ DATE: _____

BLS-FCW
FULL CUTOFF WALL PACK

The BLS-FCW Full Cutoff Wall Pack is a high performance fixture offering both durability and style featuring a slimline design. BLS-FCW has on-site dimmable output and CCT settings, allowing the contractor to set the lumen value and CCT of the fixture at the installation site to a level that is perfectly suitable for the work site. The thin shape of the BLS-FCW series was designed for applications such as factories, warehouses, self storage, commercial buildings, entrances and walkways.

SPECIFICATIONS FEATURES

Color Temperature Tuning: Capable of delivering 3000K, 4000K & 5000K color temperatures

Construction: Two-piece die-cast aluminum housing secures the thermally conductive LED panel and electrical chamber. Suitable for applications requiring 3G vibration test according to ANSI C136.31

Lens: Anti-UV prismatic translucent lens is designed to shape the light distribution and uniformity.

CRI: 70

Voltage: 120-277V or 347-480V

Dimming: 0-10V Dimmable

Controls: Optional Photocell and Emergency Battery available.

Lifespan: Estimated 50,000 Hour based on IES LM-80 results and TM-21 calculations.

Operating Temperature: -40°C to 40°C (-40˚F - + 104˚F).Note: Operating with emergency battery temperature range: 10°C to 40°C (+50˚F - + 104˚F)

Power Factor: > 0.90, THD <20%

Listings: cULus, IP66, Suitable for Wet location, RoHS compliant, Meets LM-79 LM-80 Standards. DesignLights Consortium® (DLC) Qualified Product: Unless noted, not all versions of this product may be DLC® qualified. For a complete list of Lumecon DLC® Qualified Products visit: www.designlights.org.

Warranty: 5 year warranty

NOTE- Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25°C(±5°C) specifications subject to change without notice.

Small size:
For 26W,38W,65W CCT dial
For 26W,38W,65W,100W,135W single CCT

	100 100W						

Note
1. CCT adjustable(3000K/4000K/5000K).
2. Only 65W and 100W optional for 347-480V.
3. 100W model not compatible with battery back-up.

STRUCTURAL DESIGN

PHOTOCELL

Optional photocell allows for security and energy savings.

HOUSING

Two-piece die-cast aluminum housing with optimal thermal management both enhances LED efficacy and extends fixture's life.

MOUNTING

Can be mounted directly over a standard 4' and 5' electrical junction box. Three 1/2 inch conduit holes on three sides allow for surface conduit wiring.

EMERGENCY (option)

8W Emergency battery, 900lm, 90 minute

POWER AND CCT CONTROLLER

The wattage and CCT can be changed by switch selection on the controller, it easy very fast to meet the varied requirements.

OPTICS

Zero uplight distributions. Independently designed optical lens, using anti-UV material to maximize the lighting effect while reducing glare.

Gus LED Outdoor Sconce
GUSW Series

Features
This outdoor LED light is ideal for security and general lighting.
For outdoor or indoor residential, commercial, and hospitality applications.
Fixture mounts to a standard junction box (not included).

Construction
Metal construction. Standard mounting holes and hardware are included.
Power supply connections must be made inside a junction box (not included).

Finish
Two-tone metal finish. Black exterior and Copper interior.

Electrical
Input 120 VAC / 60 Hz.
Minimum starting temp -4° F/ -20°C.

LED
Integrated LED modules capable of producing:
12W = 630 delivered lumens
20W = 950 delivered lumens
Adjustable CCT - 3000K/4000K/5000K
Rated for 50,000 Hrs., 90 CRI.

Certification
All fixtures are cETLus listed for wet locations.
Title 24/JA8 Compliant (outdoor only).

Warranty
Limited warranty: This fixture is free from defects in materials and workmanship for a period of 5 years from date of purchase.

Specifications and dimensions subject to change without notice.

OSQ Series

OSQ™ LED Area/Flood Luminaire featuring Patented NanoComfort™ Technology – Version C

Rev. Date: V9 01/30/2024

Product Description

The OSQ™ Area/Flood luminaire blends extreme optical control, advanced thermal management and modern, clean aesthetics. Built to last, the housing is rugged cast aluminum with an integral, weathertight LED driver compartment. Versatile mounting configurations offer simple installation. Its slim, low-profile design minimizes wind load requirements and blends seamlessly into the site providing even, quality illumination. Medium is suitable upgrade for HID applications up to 400 Watts. Large is suitable upgrade for HID applications up to 1000 Watts. Extra Large is suitable upgrade for HID applications up to multiple 1000 Watts.

Applications: Parking lots, walkways, campuses, car dealerships, office complexes, pickleball courts, high-mast and internal roadways

Performance Summary

Utilizes Patented NanoComfort™ Technology

Utilizes Cree TrueWhite® Technology on 5000K Luminaires

Assembled in the USA by Cree Lighting from US and imported parts

Initial Delivered Lumens: 4,000 - 85,000

Efficacy: Up to 171 LPW

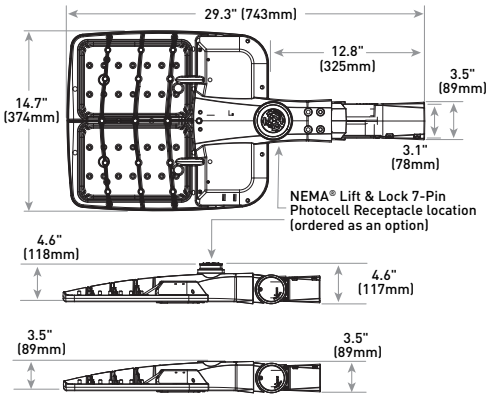
CRI: Minimum 70 CRI (3000K, 4000K & 5700K); 90 CRI (5000K)

CCT: 3000K, 4000K, 5000K, 5700K

Limited Warranty†: 10 years for luminaire; 10 years for Colorfast DeltaGuard® finish; 5 years for BML sensor; up to 5 years for Synapse® accessories; 1 year for luminaire accessories

†See http://creelighting.com/warranty for warranty terms. For Synapse accessories, consult Synapse spec sheets for details on warranty terms.

OSQM - AA Mount



Luminaire	Weight
OSQM	19.3 lbs. (8.8kg)

Note: For OSQL, OSQX and additional mounts, refer to drawings on page 27.

Ordering Information

Fully assembled luminaire is composed of two components that must be ordered separately:
Example: **Mount:** OSQ-ML-C-AA-BK + **Luminaire:** OSQM-C-4L-30K7-2M-UL-NM-BK

Mount (Luminaire must be ordered separately)*

OSQ-

Medium/Large Mounts
OSQ-ML-C-AA Adjustable Arm
OSQ-ML-C-DA Direct Arm
OSQ-ML-C-TM Trunnion Mount

Extra Large Mounts
OSQ-X-C-AA Adjustable Arm
OSQ-X-C-DA Direct Arm

Color Options: **SV** Silver **BK** Black **BZ** Bronze **WH** White

* Reference fixture mounting drill pattern, EPA, and pole configuration suitability data beginning on page 14.

Luminaire (Mount must be ordered separately)

† Lumen Package codes identify approximate light output only. Actual lumen output levels vary by CCT and optic selection. Refer to Initial Delivered Lumen tables for specific lumen values.
* Luminaire comes standard with 0-10V dimming.
** Factory-installed backlight shields are integral to luminaire optic and may not be removed in the field. For field-install backlight control, please refer to the External Backlight Shields in the accessory table on page 2.

CREE LIGHTING®

Product Specifications

CREE LIGHTING NANOCOMFORT™ TECHNOLOGY

Cree Lighting's NanoComfort™ Technology ends the trade-offs in outdoor lighting by providing superior glare reduction and visual comfort in high-efficiency illumination delivered precisely where it is needed. The basic building block of NanoComfort™Technology is a compact 4x4 array of LEDs. Each of the 16 LEDs in a module is in contact with its own acrylic polymer lens to capture and precisely direct light. With NanoComfort™ Technology, the acrylic optics are cut and sculpted into facets that relieve the glare and harshness while improving visual comfort – all while retaining superb efficacy and control.

CREE TRUEWHITE® TECHNOLOGY

A revolutionary way to generate high-quality white light, Cree TrueWhite® Technology is a patented approach that delivers an exclusive combination of 90+ CRI, beautiful light characteristics and lifelong color consistency, all while maintaining high luminous efficacy – a true no compromise solution.

CONSTRUCTION & MATERIALS

- Slim, low profile design minimizes wind load requirements
- Luminaire housing is rugged die cast aluminum with an integral, weathertight LED driver compartment and high-performance heat sink
- Acrylic optic w/clear tempered glass lens
- Some versions are provided with full circuit board, but not fully populated with LEDs or optics to scale back lumen package
- Convenient interlocking mounting method on direct arm. Mounting adaptor is rugged die cast aluminum and mounts to 3" (76mm) or larger square or round pole, secured by two 5/16-18 UNC bolts spaced on 2" (51mm) centers. Refer to page 14 for fixture mounting drill patterns
- Adjustable arm mount adapters are rugged die cast aluminum
- OSQ-ML-C-AA mounts to a horizontal or vertical 2" (51mm) IP, 2.375" (60mm) O.D. tenon and can be adjusted 180˚ in 2.5˚ increments
- OSQ-X-C-AA mounts to a horizontal or vertical 2" (51mm) IP, 2.375-2.50" (60-64mm) O.D. steel tenon and can be adjusted 180˚ in 5.0˚ increments. **NOTE: Tenon length must be a minimum of 3.75" (95mm), and tenon must be steel**
- Trunnion mount is constructed of A500 and A1011 steel and is adjustable from 0-180˚ in 15˚ degree increments. Trunnion mount secures to surface with (1) 3/4" bolt or (2) 1/2" or 3/8" bolts
- Luminaires include 15" (381mm) 18/5 cord exiting the luminaire
- Designed for uplight and downlight applications. Uplight orientation not suitable for use with N or R options
- Exclusive Colorfast DeltaGuard® finish features an E-Coat epoxy primer with an ultra-durable powder topcoat, providing excellent resistance to corrosion, ultraviolet degradation and abrasion. Silver, bronze, black, and white are available

Weight

Mount	Housing Size		
	Medium	Large	Extra Large
Direct Arm	19.7 lbs. (8.9kg)	28.8 lbs. (13.1kg)	45.8 lbs. (20.8kg)
Adjustable Arm	19.3 lbs. (8.8kg)	28.4 lbs. (12.9kg)	48.6 lbs. (22.0kg)
Trunnion	23.2 lbs. (10.5kg)	32.3 lbs. (14.7kg)	N/A

For BML sensor add 0.1 lbs. (45g), and for NEMA receptacle, add 0.3 lbs. (136g).

ELECTRICAL SYSTEM

- **Input Voltage:** 120-277V, 277-480V or 347-480V, 50/60Hz, Class 1 drivers
- **Power Factor:** > 0.9 at full load
- **Total Harmonic Distortion:** < 20% at full load
- Integral 10kV/5kA surge suppression protection standard; 20kV/10kA surge suppression protection optional
- When code dictates fusing, a slow blow fuse or type C/D breaker should be used to address inrush current
- Designed with 0-10V dimming capabilities. Dims to 10%. Controls by others
- 0-10V dimming per ANSI C137.1-2019 (8-Volt or 9-Volt per power level/options selected)
- Refer to Dimming spec sheet for details
- **Maximum 10V Source Current:** 1.8mA
- **Operating Temperature Range:** -40˚C - +40˚C (-40˚F - +104˚F)

REGULATORY & VOLUNTARY QUALIFICATIONS

- cULus Listed (UL1598)
- Suitable for wet locations
- Meets NEMA C82.77 standards
- Drivers and LEDs are UL certified in accordance with UL8750
- Meets requirements of IP66 per IEC 60529 when ordered without N or R options
- Certified to ANSI C136.31-2018, 3G bridge and overpass vibration standards
- ANSI C136.2 10kV/5kA (standard) and 20kV/10kA (optional) surge suppression protection tested in accordance with IEEE/ANSI C62.41.2
- Meets FCC Part 15, Subpart B, Class A limits for conducted and radiated emissions
- Luminaire and finish endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions as defined in ASTM Standard B 117
- Lens meets IK07 requirements per IEC 60068-2
- Assembled in the USA by Cree Lighting from US and imported parts
- Meets Buy American requirements within ARRA
- RoHS compliant. Consult factory for additional details
- Dark Sky Friendly, IDA Approved when ordered with 30K CCT and direct arm mount only. Please refer to https://darksky.org/what-we-do/darksky-approved/products-companies/#!/~/search/keyword=cree for most current information
- DLC and DLC Premium qualified SKUs available. Exceptions apply when 5L, 2B, 3B, 4B & AB optics are selected. Please refer to https://qpl.designlights.org/solid-state-lighting for most current information
- DLC Luna qualified when ordered with direct arm mount and 30K7 CCT. Please refer to https://qpl.designlights.org/solid-state-lighting for most current information
- ⚠ **CA RESIDENTS WARNING:** Cancer and Reproductive Harm – www.p65warnings.ca.gov

Product Specifications

SYNAPSE® SIMPLYSNAP INTELLIGENT CONTROL

The Synapse SimplySNAP platform is a highly intuitive connected lighting solution featuring zone dimming, motion sensing, and daylight harvesting with utility-grade power monitoring and support of up to 1000 nodes per gateway. The system features a reliable and robust self-healing mesh network with a browser-based interface that runs on smartphones, tablets, and PCs. The Twist-Lock Lighting Controller (TL7-HVG) and Site Controller (SS450-002) take the OSQ Series to a new performance plateau, providing extreme energy productivity, code compliance and a better light experience.

Synapse Wireless Control Accessories

Twist-Lock Lighting Controller
TL7-HVG
- Suitable for 120-480V (UL, UE and UH) voltages
- Requires NEMA/ANSI C136.41 7-Pin Dimming Receptacle
- Not for use with BML or Q options
- Provides On/Off switching, dimming, power metering, digital sensor input, and status monitoring of luminaire
- Refer to TL7-HVG spec sheet for details

SimplySNAP Central Base Station
CBSSW-450-002
- Includes On-Site Controller (SS450-002) and 5-button switch
- Indoor and Outdoor rated
- Refer to CBSSW-450-002 spec sheet for details

Synapse Wireless Sensor
WSN-DPM
- Motion and light sensor
- Control multiple zones
- Refer to WSN-DPM spec sheet for details

SimplySNAP On-Site Controller
SS450-002
- Verizon® LTE-enabled
- Designed for indoor applications
- Refer to SS450-002 spec sheet for details

Building Management System (BMS) Gateway
BMS-GW-002
- Required for BACnet integration
- Refer to BMS-GW-002 spec sheet for details

Outdoor Antennas
(Optional, for increased range, 8dB gain)
KIT-ANT420SM
- Kit includes antenna, 20' cable and bracket

KIT-ANT360
- Kit includes antenna, 30' cable and bracket

KIT-ANT600
- Kit includes antenna, 50' cable and bracket
- Refer to Outdoor antenna spec sheet for details

10˚C (50˚F)	1.02	0.98	0.93	0.87	0.82
15˚C (59˚F)	1.01	0.98	0.92	0.87	0.82
20˚C (68˚F)	1.01	0.97	0.92	0.86	0.81
25˚C (77˚F)	1.00	0.97	0.91	0.86	0.81

[1] Lumen maintenance values at 25˚C (77˚F) are calculated per IES TM-21 based on IES LM-80 report data for the LED package and in-situ luminaire testing. Luminaire ambient temperature factors (LATF) have been applied to all lumen maintenance factors. Please refer to the Temperature Zone Reference Document for outdoor average nighttime ambient conditions.
[2] In accordance with IES TM-21, Reported values represent interpolated values based on time durations that are up to 6x the tested duration in the IES LM-80 report for the LED.

Accessories

Field-Installed

External Backlight Shield
OSQ-M-C-BLSF (Medium)
OSQ-L-C-BLSF (Large)
OSQ-X-C-BLSF (Extra Large)
- Not for use with rotated optics
- Provides 1 mounting height backlight cutoff
- 18 ga. steel construction w/black finish

Bird Spikes
OSQ-M-C-BRDSPK (Medium)
OSQ-L-C-BRDSPK (Large)
OSQ-X-C-BRDSPK (Extra Large)
- Includes bird spikes (three rows for M/L; four rows for X) and screws to attach to housing

Shorting Cap
XA-XSLSHRT

Photometry

** These EPA values must be multiplied by the following ratio: Fixture Mounting Height/Total Pole Height. Specify pole size: 3 (3"), 4 (4"), 5 (5"), or 6 (6")

Tenons and Brackets‡ (must specify color)

Square Internal Mount Vertical Tenons (Steel)
- Mounts to 3-6" (76-152mm) square aluminum or steel poles

PB-1A* – Single
PB-2A* – 180˚ Twin
PB-3A* – 180˚ Triple
PB-4A*(90) – 90˚ Quad
PB-4A*(180) – 180˚ Quad

Square Internal Mount Horizontal Tenons (Aluminum)
- Mounts to 4" (102mm) square aluminum or steel poles
- Not for use with OSQX luminaires

PD-2A4(90) – 90˚ Twin
PD-2A4(180) – 180˚ Twin
PD-3A4(90) – 90˚ Triple
PD-4A4(90) – 90˚ Quad

Wall Mount Brackets
- Mounts to wall or roof

WM-2 – Horizontal for OSQ-ML-C-AA or OSQ-X-C-AA mounts
WM-4 – L-Shape for OSQ-ML-C-AA or OSQ-X-C-AA mounts
WM-DM – Plate for OSQ-ML-C-DA mount

Round External Mount Vertical Tenons (Steel)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons

PB-2R2.375 – Twin
PB-3R2.375 – Triple
PB-4R2.375 – Quad

Round External Mount Horizontal Tenons (Aluminum)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons
- Mounts to square pole with PB-1A* tenon
- Not for use with OSQX luminaires

PT-1 – Single (Vertical)
PT-2(90) – 90˚ Twin
PT-2(180) – 180˚ Twin
PT-3(90) – 90˚ Triple
PT-3(120) – 120˚ Triple
PT-4(90) – 90˚ Quad

Mid-Pole Bracket
- Mounts to square pole

PW-1A3** – Single
PW-2A3** – Double

Ground Mount Post
- For ground-mounted flood luminaires

PGM-1 - for OSQ-ML-C-AA or OSQ-X-C-AA mounts

‡ Refer to the Bracket and Tenons spec sheet for more details

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (rounded to nearest 1000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (rounded to nearest 1000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (rounded to nearest 1000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (rounded to nearest 1000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

* X1 option not available with 16L lumen package.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (rounded to nearest 1000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (</= 24,000 lumens rounded to nearest 1000 lumens, > 24,001 lumens rounded to the nearest 2000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

* X1 option not available with 30L lumen package.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings. When ordered with the N option, the luminaire will include an ANSI C136.15-2020 utility label that indicates the wattage (rounded to nearest 10W), the lumen output (</= 24,000 lumens rounded to nearest 1000 lumens, > 24,001 lumens rounded to the nearest 2000 lumens), and the CCT of the luminaire at the selected lumen output. Additional dimming functionality is available when a dimming control (by others) is used in the 7-Pin receptacle.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others). When ordered with the N option, the luminaire will include a utility label that indicates the wattage, lumen output, and CCT of the setting selected.

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others).

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings.

Locked Lumen Output (X8/X7/X6/X5/X4/X3/X2/X1) Option Description:

The Locked Lumen Output option on this page permanently locks the lumen output on the OSQ area luminaire to the setting selected. When ordered with the X option, the luminaire will be shipped from the factory at the lumen output setting selected and will only be able to be adjusted down in the field through a dimming control (by others).

PLANNING COMMISSION RESOLUTION 2024-08

EXHIBIT B

A RESOLUTION OF THE TOWN OF TRUCKEE PLANNING COMMISSION APPROVING APPLICATION 2021-00000060/DP (SILVER CREEK ESTATES)

DRAFT STATE DENSITY BONUS

Pursuant to State Density Bonus Law (SDBL), the following modifications to the Development Code are granted for the Silver Creek Estates Project:

1. Density Bonus: Four additional units are approved beyond the maximum allowable gross residential density on site, for a total of 40 units.

   [For reference: The allowable density for the project site is 36 units. The applicant is deed-restricting five units to affordable rents. Under SBDL, this qualifies the project for a 23% increase in density, or 8 additional units. The applicant is choosing to construct four additional units.]

2. Incentive/Concession: Private Exterior Space: The applicant is requesting a reduction in both the size and provision of private exterior space. The patios and balconies provided are smaller than required by the Development Code and carriage units are not provided private exterior space.

   [For reference: Development Code Section 15.58.180 (Multifamily Residential Projects) requires that each multifamily unit have private exterior space as either a balcony, deck or patio. A private balcony shall have an area of at least 60 sf and a patio shall have an area of at least 90 sf. Both amenities shall not have a dimension less than six feet].

3. Waiver: Maximum Site Coverage: The project is proposing 50,161 sf of site coverage, or 67.3% of the project site.

   [For reference: The standard coverage requirement for parcels greater than 10,000 sf in the RM (Multi-family Residential) zoning district is a 40% maximum].

4. Waiver: Required Open Space of 30%: The project is not providing open space.

   [For reference: The open space requirement for the RM (Multi-family Residential) zoning district is 30%.]

5. Waiver: Common Recreational Amenity: The proposed project does not provide any recreational amenities.

   [For reference: All multifamily residential developments with 10 or more units are to provide a minimum of one indoor/outdoor recreational amenity for every 25 units or fraction thereof within the common open space areas.]

6. Waiver: Common Useable Open Space of 250 sq ft Per Unit: The project does not provide any common open space.

*[For reference: All multifamily residential developments with five or more units are required to incorporate common open space consisting of active recreation and natural preservation areas. The project shall be designed to provide the equivalent of a minimum of 250 square feet of common open space for each dwelling unit. To meet Development Code standards, Silver Creek would need to provide 9,000 square feet of common open space (36 units * 250 sf).]*

7. Reduction: Parking Lot Interior Landscaping: The project provides less than the required amount of parking lot interior landscaping.

   [For reference: Landscaping shall be evenly dispersed throughout the parking lot at a ratio of 200 square feet of landscaped area for every five parking stalls or fraction thereof. Two trees and four shrubs shall be provided for every five parking stalls or fraction thereof.]

8. Reduction: Setback Landscaping: The project provides a portion of the required front and side yard setback landscaping.

   [For reference: All front yard setback areas and side yard setback areas shall be landscaped, except where a required setback is occupied by a drainage facility, structure, parking space, sidewalk or driveway, or where a required setback is screened from public view.]

9. Reduction: Parking Lot Perimeter Landscaping: The project provides a portion of the required perimeter landscaping.

   [For reference: Parking lots shall be landscaped both adjacent to streets and side or rear property lines. Development Code Section 18.40.040.B.3 requires at least a six-foot-wide landscaping buffer for parking areas.]

10. Parking Requirements. The project provides 72 off-street parking spaces, with 26 spaces located in individual garages.

    *[For reference: Development Code Chapter 18.48 (Parking and Loading Standards) provides a parking demand for the project resulting in 85 parking spaces, with 35 of the spaces located in a garage (24 * 1.5 = 36, 16 * 2 = 32, 36 + 32 = 68, 68 * 0.25 = 17, 68 + 17 = 85)*

    SDBL limits the amount of parking the Town can require for a density bonus housing project. The Town cannot require more than 48 parking spaces, none of which must be covered.

    *16 two-bedrooms (16 * 1.5 = 24) + 15 one-bedroom + 9 studios = 24+15+9 = 48 parking spaces]*

PLANNING COMMISSION RESOLUTION 2024-08

EXHIBIT C

A RESOLUTION OF THE TOWN OF TRUCKEE PLANNING COMMISSION APPROVING APPLICATION 2021-00000060/DP (SILVER CREEK ESTATES)

DRAFT CONDITIONS OF APPROVAL

General Conditions of Approval

1. A Development Permit to allow for construction of 40 multifamily residential units within 10 buildings located at Winter Creek Loop - No Address Assigned (APN 019-820-001-000) is hereby approved as described in the May 21, 2024 staff report and as shown on the site plans and civil drawings approved by the Planning Commission on May 21, 2024 and on file in the Community Development Department except as modified by these conditions of approval.

2. A density bonus of 4 units is approved. Parking reductions as allowed by State Density Bonus Law is approved. One concession/incentive and seven waivers/reductions, as described in the May 21, 2024 staff report and incorporated as Exhibit B, are approved. (***Planning Division Recommendation)***

3. The applicant is responsible for complying with all conditions of approval and providing evidence to the Community Development Director of compliance with the conditions. A meeting with the Planning and Engineering Divisions is required prior to building permit submittal to review the conditions of approval and identify any changes in the project from the approved plan set. The applicant shall pay the hourly rate of staff time for this meeting and review of any proposed changes. An Administrative Review fee based on three hours of staff time (currently $186 for the Planning Division and $200 for the Engineering Division) shall be submitted as an initial deposit prior to scheduling the meeting. The staff time rates shall be based on the current Town of Truckee fee schedule in effect at the time the meeting is scheduled. ***(Planning Division Recommendation)***

4. A matrix or letter shall be submitted as part of any grading or building permit application indicating how each condition has been met. Review of building permits will not commence until an itemized list of conditions of approval and status is provided. As part of the matrix or letter, the applicant shall identify any changes made from the Planning Commission approved plan set design. ***(Planning Division Recommendation)***

5. The effective date of approval shall be June 3, 2024 unless the approval is appealed to the Town Council by 5:00 PM on Friday, May 31, 2024. In accordance with Section 18.84.050 of the Development Code, the Development Permit shall be exercised within two (2) years of the effective date of approval, and the project shall be completed within four (4) years after the effective date of approval. Otherwise, the approval shall become null and void unless an extension of time is granted by the Planning Commission, in compliance with Section 18.84.055 (Time Extensions). ***(Planning Division Recommendation)***

6. The Community Development Director may authorize minor alterations to the approved Development Permit in accordance with Section 18.84.070(B)(1) of the Development

Code, including a reduction in the size of the project. Major changes and alterations to the approved plans and conditions of approval shall be reviewed and approved by the Planning Commission in accordance with Section 19.84.070(B)(2) of the Development Code. (***Planning Division Recommendation)***

7. Except as modified by these conditions of approval, the project shall comply with all applicable provisions and standards of the Development Code (effective date May 27, 2021) including, but not limited to the following:

    a. General Development Standards as contained in Table 2-9 including site coverage, setbacks, and height limits;
    b. Air Emissions in accordance with Section 18.30.030;
    c. Drainage and stormwater runoff in accordance with Section 18.30.050;
    d. Bicycle Parking in accordance with Section 18.48.090;
    e. Building Height in accordance with Section 18.30.090;
    f. Snow Storage in accordance with Section 18.30.130;
    g. Exterior Parking in accordance with Chapters 18.48 and 18.50;
    h. Exterior lighting in accordance with Section 18.30.060;
    i. Solid Waste/Recyclable Materials in accordance with Section 18.30.150;
    j. Open Space in accordance with Section 18.46.060;
    k. Off-Street Loading Space Requirements in accordance with Section 18.84.100;
    l. Property Maintenance in accordance with Section 18.30.100;
    m. Parking in accordance with Chapters 18.48 and 18.50;
    n. Landscaping in accordance with Chapters 18.40 and 18.42. (***Planning Division Recommendation)***

8. Any fees due to the Town of Truckee for processing this project shall be paid to the Town within thirty (30) calendar days of final action by the approval authority. Failure to pay such outstanding fees within the time specified shall invalidate any approval or conditional approval granted by this action. No permits, site work, or other actions authorized by this determination shall be permitted, authorized, or commenced until all outstanding fees are paid to the Town. (***Planning Division Recommendation)***

9. The applicant shall defend, indemnify, and hold harmless the Town and its agents, officers, and employees from any claim, action, or proceeding against the Town to attack, set aside, void, or annul the approval of the Planning Commission, which action is brought within the time period provided for by State law. (***Planning Division, Town Attorney***)

10. Prior to issuance of any grading or building permits for the project, the applicant shall provide performance guarantees with sufficient legal commitments and financial sureties to guarantee the faithful performance of any and all conditions of approval and completion of the phase or to guarantee the restoration of the site if the phase is not completed. The form, manner, and amount of the guarantee shall comply with the requirements of the Town Planner and the Town Attorney and shall be reviewed and approved by the Community Development Director prior to issuance of permits. (***Development Code Section 18.84.040***)

11. Prior to commencement of any work on the site, the applicant shall obtain grading and building permit(s) for all work on the building(s) and site. Complete building plans and engineering in accordance with the current Town Building Code will be required for all structures. The building plans shall include details and elevations for all State of California, Title 24, and accessibility regulations. Please contact the Building Division at

(530) 582-7821 to determine what permits are required. ***(Building Division Recommendation)***

12. Prior to grading or building permit issuance, the applicant shall demonstrate compliance with all conditions and requirements of the following agencies, including, but not limited to:
    - Town of Truckee Engineering Division
    - Liberty
    - Town of Truckee Building Division
    - Truckee Donner Public Utility District
    - Truckee Sanitary District
    - Truckee Fire Protection District
    - Nevada County Department of Environmental Health
    - Tahoe Truckee Sierra Disposal Company
    - Southwest Gas ***(Planning Division Recommendation*)**

13. Prior to the issuance of building permits or improvement plans, the applicant shall submit payment for a construction mitigation fee. The fee amount is established by the Town Fee Schedule in effect at the time of building permit submittal. ***(Planning Division Recommendation)***

14. *Construction Hours:* Hours of operation of construction activities shall be limited to 7:00 AM and 9:00 PM Monday through Saturday and 9:00 AM and 6:00 PM on Sunday, unless the Community Development Director authorizes an extension of the time limitations based on the finding that the noise levels from the construction activities will not negatively affect the residential uses in the surrounding area. No construction shall be permitted on designated holidays set by the Town. If a noise complaint is received after the construction time limits are extended, the Community Development Director has the ability to render the extended time limits null and void and the applicant shall revert to the aforementioned hours of operation time limitations. Interior construction activities may occur after these hours if such activities will not result in exterior noise audible at property lines. Improvement, grading, and building plans shall note these limited hours of construction. ***(Planning Division Recommendation)***

Engineering Division Conditions

15. Prior to building (grading) permit issuance, the project proponents shall submit improvement plans stamped by a licensed civil engineer to the satisfaction of the Town Engineer for all work both in and out of the proposed public right-of way, easements and private roadways.

    The plans shall be prepared in accordance with the Town of Truckee Public Improvement and Engineering Standards dated May 2003; shall comply with the design standards identified in Water Quality Order No. 2013-0001-DWQ NPDES General Permit No. CAS000004, such as hydro-modification requirements, or the most current Phase 2 Municipal Separate Storm Sewer System (MS4) Permit; and shall comply with the Statewide Construction General Permit No. 2009-009-DWQ or most current permit. The plans at a minimum shall incorporate proposed grades, drainage, driveway design and erosion control; and incorporate cost estimates for all work to be performed.

Said improvement plans shall be accompanied by appropriate plan check fees to be calculated by the Town Engineer at the time of plan approval. Public improvement plan check fees and inspection fees are calculated using the estimated construction costs. The plan check fee is equal to the following formula based upon the estimated construction costs:

5% of valuation from $0 to $50,000
3% of valuation from $50,000 to $250,000
1% of valuation above $250,000

The inspection fee, due prior to start of construction, is equal to the following formula based upon the estimated construction costs:

6% of valuation from $0 to $50,000
4% of valuation from $50,000 to $250,000
1.5% of valuation above $250,000
(Engineering Division Requirement)

16. Prior to Parcel Map Recordation, Lot Line Adjustment, Subdivision Map Recordation, or building (grading) permit issuance, the project proponents shall provide identification of all existing drainage on the property and adjacent properties, which may affect this project. This identification shall show discharge points on all downstream properties as well as drainage courses before and after the proposed development for the 10-year and 100-year flows. ***(Engineering Division Requirement)***

17. Prior to building (grading) permit issuance, the applicant shall provide an erosion control plan and stormwater quality plan, per the requirements of the Town of Truckee for review and approval that shows temporary construction BMPs and permanent on-site treatment of the 85th percentile, 24-hour storm. The plan shall provide details for the proposed project stormwater collection and treatment including the safe release of overflow. ***(Engineering Division Requirement)***

18. If the project disturbs one acre or more or is part of a larger planned development, the project shall also comply with the Statewide Construction General Permit No. 2009-009-DWQ or most current permit. Prior to building (grading) permit issuance, the applicant shall provide the WDID number issued by the State Water Resources Control Board. ***(Engineering Division Requirement)***

19. Hydromodification Requirement: If the project creates or replaces one acre or more of impervious surface, post-project storm water flows shall equal pre-project flows for the design year event (2-year, 24-hour storm or current standard), unless additional mitigations are proposed by the applicant and approved by the Town Engineer to provide for the increase in flows. ***(Engineering Division Requirement)***

20. Prior to building (grading) permit issuance, the applicant shall submit a Best Management Practice (BMP) operation and maintenance plan to the Town Engineer for review and approval. Recordation of the operation and maintenance plan for permanent structural treatment control BMPs installed by the project may be required depending on the type of permanent BMP proposed. The property owner shall submit yearly BMP operation and maintenance certifications to the Engineering Division according to the Water Quality Order No. 2013-0001-DWQ NPDES General Permit No. CAS000004 or the most current

Phase 2 Municipal Separate Storm Sewer System (MS4) Permit. ***(Engineering Division Requirement)***

21. Prior to building (grading) permit issuance, the applicant shall pay traffic impact fees applicable at the time of building permit issuance. As of February 23, 2024, based on 27,055 SF of Multi-Family Residential (calculation utilized "Building Summary" on Cover Sheet and assumed 50% of SF for buildings with garages below), the estimated traffic impact fees for the proposed project are **$97,398.00**. The actual traffic impact fees will be based upon the development square footage proposed and current fee schedule adopted by the Town Council in effect at the time of building permit issuance. See Resolution No. 2023-07 for more information on the Town's AB1600 Fee Program. ***(Engineering Division Requirement)***

22. Prior to building (grading) permit issuance, the applicant shall pay facilities impact fees applicable at the time of building permit issuance. As of February 24, 2024, based on 27,055 SF of Multi-Family Residential (calculation utilized "Building Summary" on Cover Sheet and assumed 50% of SF for buildings with garages below), the estimated facilities impact fees for the proposed project are **$44,911.30**. The actual facilities impact fees will be based upon the development square footage proposed and the current fee schedule adopted by the Town Council in effect at the time of building permit issuance. ***(Engineering Division Requirement)***

23. Prior to building (grading) permit issuance, structures shall be designed such that snow will not shed into pedestrian areas, onto parked vehicles, into drive aisles, or onto adjacent properties. ***(Engineering Division Recommendation)***

24. Prior to building (grading) permit issuance, provide a snow removal/storage plan for approval by Town Engineer that shows snow storage calculations (50% of impervious area), locations, and how snow will be put in those locations. Snow storage locations should be easily accessible (i.e. no curbs). Provide snow storage as close to the source as possible with a means of containment (typically an earthen berm) to prevent contaminants from leaving the project site (if applicable based on topography/proximity to sensitive areas). Snow storage is not permissible within or above stormwater conveyance and treatment facilities. At the Town Engineer's discretion, a snow off-haul plan may be prepared by the applicant for 50% of the required snow storage on a site. This plan shall be reviewed and approved by the Town Engineer prior to land use entitlement and building permit issuance. ***(Engineering Division Requirement)***

25. The project shall ensure that the existing paved trail along the frontage of the property remains a minimum of five feet wide at the conclusion of the project. If any portion of the trail is damaged during construction or is less than five feet wide, as originally constructed by the Winter Creek development, the project proponent will be responsible for reconstructing the trail to five feet wide and to the satisfaction of the Town Engineer. A pedestrian connection between the proposed buildings and the public way (paved trail) will be required. ***(Engineering Division Requirement)***

26. Prior to Parcel Map Recordation, Lot Line Adjustment, Subdivision Map Recordation, or building (grading) permit issuance, the applicant is required to offer for dedication to the Town an easement for any portions of the frontage improvements that are outside of the Winter Creek Loop right-of-way. ***(Engineering Division Requirement)***

27. Prior to building (grading) permit issuance, the applicant will be required to enter into a Roadway Maintenance agreement with the Winter Creek Owners' Association for both short-term (i.e. snow removal, sweeping, and drainage facility maintenance) and long-term maintenance/replacement of Winter Creek Loop from Brockway Road through the Winter Creek Loop/Winter Creek Loop intersection where the project driveway is proposed to connect. If an agreement cannot be reached with the Winter Creek Owners' Association for maintenance of the roadway section, the project proponent may choose to identify itself as the sole responsible member of the agreement for maintenance of the roadway as described above. The Roadway Maintenance agreement will be reviewed and approved by the Town Engineer, and will be recorded against the property. ***(Engineering Division Requirement)***

28. Prior to Parcel Map Recordation, Lot Line Adjustment, Subdivision Map Recordation, or building (grading) permit issuance, the applicant is to offer for dedication to the Town of Truckee 20' wide drainage easement centered along all drainage paths that cross the applicant property. ***(Engineering Division Recommendation)***

29. Prior to Parcel Map Recordation, Lot Line Adjustment, Final Map Recordation, or certificate of occupancy, all roadway, drainage, frontage and utility improvements shall be constructed and approved by the respective responsible agencies or a financial surety in the following amounts consistent with section 18.108 of the Development Code and to the satisfaction of the Town Engineer:

    - If provided as a cash deposit, 125% of the costs of the remaining improvements.
    - If provided as a bond or letter of credit, a guarantee for Faithful Performance equal to 100% of the costs of the remaining improvements and a guarantee for Materials and Labor equal to 100% of the costs of the remaining improvements.

    "Cost of remaining improvements" includes construction management costs. The limits of the remaining improvements will be reviewed and approved by the Town Engineer. ***(Engineering Division Requirement)***

30. Prior to building (grading) permit issuance, approvals from individual utility providers impacted by the development shall be obtained and copies of approvals shall be provided to the Town Engineer to ensure there are no objections by affected utilities and that the project proponents are coordinating improvements. ***(Engineering Division Requirement)***

31. Prior to building (grading) permit issuance or certificate of occupancy (whichever is specified), the applicant shall conform to all Engineering mitigation measures that are outlined in the final Winter Creek Subdivision Initial Study/Mitigate Negative Declaration (or more recent Environmental Document). ***(Engineering Division Requirement)***

32. Prior to certificate of occupancy, the applicant shall provide the Town As-Builts for all public improvements required by the project, including, but not limited to: sidewalks, trails, transit shelters, drainage facilities, etc. The as-built drawings shall be completed by the Contractor and submitted to the Engineer in electronic format upon completion of construction and prior to the acceptance of the improvements by the Town Engineer. As-built drawings shall include all changes made during construction and shall be signed by the engineer of record and the contractor. In addition, a digital copy of the plans and survey control shall be submitted for the Town's use.

Electronic files shall be submitted to the Town of Truckee in PDF format and in one or more of the following formats:

1. AutoCAD 2018 (or older) format *.dwg CAD files to generate all final drawings and maps, with any associated images as geo-referenced 8-bit PC format TIFF files, with coordinate system defined.
2. ArcGIS-compatible shapefiles or coverages, with images as geo-referenced 8-bit PC format TIFF files, and any raster data in ESRI GRID format, with coordinate system defined.

The CAD or GIS system must have a defined coordinate system. The Town prefers that all submitted data be in Lambert Conformal Conic NAD 1983 CA State Plane II FIPS project, to match the existing Town of Truckee GIS data. ***(Engineering Division Recommendation)***

Other Conditions of Approval

33. Cultural Resources: In the event that archaeological or cultural resources are discovered during any construction, all construction activities shall cease within 200 feet of the find unless a lesser distance is approved by the Community Development Director, and the Community Development Department shall be notified so that the extent and location of discovered materials may be recorded in a written report prepared by a qualified archaeologist, and disposition of discovered materials may occur in compliance with State and Federal law. Construction shall not recommence until the Director authorizes construction to begin. This note should be included in the construction plan set. ***(Development Code Section 18.30.040)***

34. Parking Requirements: As SDBL allows reduced parking requirements, the parking requirements for this project are as follows:

    - 72 parking spaces are required

        1) 40 of the 72 spaces outside of Liberty Easement of which 26 spaces are located in garages)

35. Parking Requirements: The parking and circulation dimensions shall be in compliance with Development Code Chapter 18.48 (Parking and Loading Standards). All required parking spaces and walkways shall be kept clear of snow so they are useable year-round. Snow must be kept on the confines of the property as approved and may not be moved onto or stored on the Town maintained right-of-way or Town snow storage easements, unless specifically approved by the Town Engineer. ***(Development Code Chapter 18.48)***

36. The property owner(s) shall either manage the property or hire a property management company (companies) to manage leasing, parking plan, monitoring, complaints, and enforcement of the requirements of the entire project site. If a property management company (companies) is hired, the developer shall provide a copy of the executed contract to the Community Development Director prior to final occupancy for review and approval. ***(Planning Division Recommendation)***

37. Parking Management Plan: The property manager must assign parking spaces, outline enforcement methods and any other management efforts as deemed necessary. All leases must clearly indicate that on street parking in the Winter Creek subdivision is not allowed year-round. ***(Planning Division Recommendation)***

38. Snow Storage Plan: Prior to issuance of any grading permit, building permit, and/or improvements plans, the developer shall submit a final snow storage plan for approval by the Town Engineer to meet the standards of Development Code Section 18.30.130 (Snow Storage). Snow storage equal to 50% of the area of the paved parking and circulation area is required.

    Snow storage areas are required to be located near the sides or rear of parking areas, away from the primary street frontage, shall be a least 10 feet in any direction, and shall be designed to drain toward on-site drainage retention/treatment facilities. Snow storage areas are prohibited in drainage basins or in heavily landscaped areas.

    All parking spaces and walkways shall be kept clear of snow so they are useable year-round. Snow storage is prohibited in drainage basins or in heavily landscaped areas. Snow must be kept on the confines of the property and may not be moved onto or stored on the Town maintained right-of-way or Town snow storage easements, unless specifically approved by the Town Engineer, and shall not impact traffic visibility. Any future modifications shall be reviewed and approved by the Town Engineer and Community Development Director prior to implementation. ***(Planning Division Recommendation)***

39. Exterior Lighting: Prior to building permit issuance, a final lighting plan identifying locations, types, and lumens for all lights on site, including proposed building and existing parking lot lighting shall be submitted. All lights are required to be fully shielded and shall not trespass onto adjacent properties. A final photometric plan demonstrating that light will not trespass onto adjacent properties is required. Timers and sensors are required to be used to ensure that excessive lighting is avoided. Lights shall be color corrected with warm color temperatures, 3,000K or less. ***(Planning Division Recommendation)***

40. Any mechanical equipment, including utility meters and individual air conditioning units, shall be screened from public view and designed to complement the adjacent building design. Screening shall be compatible in color and materials of adjacent buildings. All flashing, vents, gutters, and bear boxes shall be painted in a color to blend with adjacent building colors. Prior to building permit final, all screening will be inspected to ensure compliance with this condition. ***(Planning Division Recommendation)***

41. Solid Waste and Recycling: Prior to building permit issuance, a final solid waste plan shall be approved by the Planning Division to verify that the project is in compliance with Development Code Section 18.30.150 (Solid Waste/Recyclable Material Storage), including but not limited to minimum solid waste and recyclable material storage area requirements, and in compliance with State of California requirements for food waste. The applicant shall provide a copy of a “will-serve” letter or equivalent from Tahoe Truckee Sierra Disposal (TTSD) to ensure that the final solid waste and recycling collection plan will be serviced by TTSD. The proposed storage areas are required to be located within 250 feet of an access doorway to the residential units which they are intended to serve and should accommodate storage of all mixed waste, recyclables and cardboard. The storage areas shall be properly screened and resistant to wildlife. Storage areas are required to be compatible with the project and surrounding structures and land uses and screened from the public right-of-way. The solid waste and recycling receptacle area(s) shall be designed to divert drainage from adjoining roofs and pavement around the receptacle. The solid waste and recycling receptacle(s) shall also be covered when not in use or during storm events. The applicant shall pay to have the project site serviced as frequently as necessary to ensure there is no stockpiling of food byproducts, garbage, packaging materials, etc. and to reduce potential impacts on adjacent properties in terms

of odors, wildlife nuisances, etc. The solid waste and recyclables storage areas shall be kept tidy and free from loose debris at all times.

To meet the Solid Waste requirements, the applicant has indicated they will pay additional fees to TTSD to have twice weekly service and dumpster pull-out service. ***(Planning Division, Development Code Section 18.30.150)***

42. Bear boxes must meet the following requirements: made of metal, stone, brick, concrete, or equivalently sturdy material; have a front-facing door; fit two 32-gallon cans; have a roof with side or back snow shedding; and have plunging pins securing the top and bottom locking mechanism. Bear sheds must be located out of the Town right-of-way and within twenty-eight feet of the edge of the roadway. Trash cans and bear boxes must be clearly labelled for each residential unit so that TTSD may attribute any additional trash charges to the appropriate residential unit. Carts must be wheeled to the edge of the street for weekly collection. The project shall comply with all applicable Truckee Tahoe Sierra Disposal (TTSD) requirements for the location, dimensions, and maintenance of the trash enclosure and shall be reviewed and approved by TTSD prior to building permit issuance. The dumpsters shall be maintained and monitored to ensure that the project is being adequately serviced. ***(Solid Waste and Recycling Division Recommendation***)

43. No wood-burning appliances are proposed or approved as part of this project. ***(Planning Division Recommendation)***

44. The number of bike parking spaces shall comply with Development Code Section 18.48.090 (Bicycle Parking and Support Facilities). For residential projects, one long-term parking space is required for each unit that does not have a fully enclosed garage, and additional short-term bicycle parking provided for guests at a rate of one space per ten residential units (a minimum of two guest spaces shall be provided in all cases). Long-term bicycle parking shall be located at ground level and covered from the elements and may be located in a locked enclosure or secure area internal to a building. Prior to building permit issuance, the Planning Division shall verify that the project provides the required number of secure bicycle parking spaces or storage prior to building permit issuance. The dimensions, location, and design of the bicycle parking shall be in compliance with Development Code Section 18.48.090 (Bicycle Parking and Support Facilities). ***(Planning Division Recommendation)***

45. Prior to final certificate of occupancy, the bicycle parking spaces shall be installed. Each bicycle parking space shall include a stationary parking device, mounted to the ground to adequately support the bicycle. Each bicycle space shall be a minimum of two feet in width and six feet in length and have a minimum of seven feet of overhead clearance; shall be conveniently located and generally within proximity to the main entrance of a structure; and be separated from motor vehicle parking spaces or aisles by a fence, wall or curb, or by at least five feet of open area, marked to prohibit motor vehicle parking. ***(Planning Division Recommendation)***

46. Utilities: All new utilities to serve the subject property shall be undergrounded in accordance with the requirements of the Development Code and the Town Engineer. The entirety of this work shall be completed in conjunction with the grading plans for the development and shall be included in the engineered improvement plans prepared for this project. **(*Development Code Section 18.30.160)***

47. The applicant shall pay all required impact fees as required by each respective District, including fire, school and recreation fees. Enforcement and clarification to any of these agency/district requirements and the necessary timing for satisfying these requirements is at the discretion of the respective agency/district ***(Planning Division Recommendation)***

48. Prior to building permit issuance, the applicant shall provide a dust suppression plan, in compliance with Development Code Section 18.30.030 (Air Emissions). ***(Development Code Section 18.30.030)***

49. All graded areas shall be protected from wind and water erosion. Interim erosion control plans shall be required, certified by the project engineer, and reviewed and approved by the Town Engineer prior to building permit issuance. Permanent erosion control measures in accordance with Best Management Practices of the "Project Guidelines for Erosion Control for the Truckee River Hydrologic Unit" as adopted by the Lahontan Regional Water Quality Control Board shall be reviewed by the Town Engineer prior to building permit issuance. Prior to building permit final, the permanent erosion control shall be reviewed and approved by the Building Division. ***(Planning Division Recommendation)***

50. Survey: Prior to building permit issuance, a survey shall be submitted that shows topography and easements on the property. ***(Planning Division Recommendation)***

51. Prior to building permit issuance, the applicant shall provide a tree protection plan in compliance with Development Code Section 18.30.155 (Tree Preservation). ***(Development Code Section 18.30.155)***

52. No trees shall be removed unless a grading permit or building permit is issued by the Town of Truckee Building Division. ***(Planning Division Recommendation)***

53. Signs: No new signs are proposed or approved as part of this approval, including any "A-frame" or similar temporary signage. A Sign Plan application, consistent with the Development Code requirements for signs, shall be submitted for review and approval by the Planning Division prior to installation of any signage. The required Sign Plan review fee will be based on the Town of Truckee fee schedule in effect at the time the Sign Plan application is submitted. ***(Planning Division Recommendation)***

54. No temporary signage is approved with this project. Any future temporary signage shall be required to apply for a Temporary Sign Permit for review and approval. ***(Planning Division Recommendation)***

55. Inclusionary Housing and Density Bonus: The project proposes to construct 36 multifamily residential units (does not include bonus units). In compliance with Development Code Chapter 18.212 (Inclusionary Housing), 15 percent of the units are required to be inclusionary units (5.4 units). The project shall construct five affordable housing units and pay 40% of the affordable housing in-lieu fee. Under Town Council Resolution 2022-77, the current in-lieu fee is $134,413 per unit with an administrative fee based on one hour of staff time (currently $186). The affordable housing in-lieu fee required for the fractional unit would be $53,765.02 (40% of 134,413) plus the $186 administrative fee. However, the applicant shall pay the affordable housing in-lieu fee and hourly staff fee in effect at the time of building permit issuance.

For lower income units, housing costs (rent and reasonable utility costs) may not exceed 30% x 60% of the area median income for a household size suitable for the unit and meet all State Density Bonus Law requirements

56. The affordable housing units shall be restricted in perpetuity. The deed restriction shall be in compliance with Chapter 18.210.090 (Affordable Housing Agreement) and submitted prior to building permit issuance for review and approval by the Community Development Director and Town Attorney. Payment of the affordable housing in-lieu fee shall be made prior to building permit issuance. The deed restriction shall be recorded prior to issuance of final occupancy. ***(Planning Division Recommendation)***

57. All building materials and colors shall be consistent with the applicant submittal, and as described in the May 21, 2024 Planning Commission staff report. ***(Planning Division Recommendation)***

58. Prior to building permit submittal, the applicant shall provide a copy of written permission from Liberty allowing all proposed development in the Liberty Transmission Line Easement. Conditions that must be met prior to receiving written approvals are listed in the letter from Liberty dated January 16, 2022. As additional improvements have been proposed since the writing of the Liberty letter, the written letter must include permission to install all improvements as shown in the approved plans. A Project Amendment may be required if improvements are not allowed in the Liberty easement. ***(Planning Division Recommendation)***

59. The project shall comply with the 2022 California Building code of Regulation's or current codes enforced during time of submittal with emphasis on ADA and sound transmission requirements (CBC section 1206). Recommend pre-submittal meeting with design professional. ***(Building Division)***

60. Final Landscaping Plan: The project shall provide landscaping in accordance with Chapters 18.40 and 18.42 and Section 18.30.155 of the Development Code, and as follows:
    - Prior to building permit issuance, the applicants shall submit a final landscaping plan for review and approval by the Community Development Director. All plants shall be appropriate for the Truckee climate. Native, adapted, and drought tolerant plants are preferred. The final landscape plan shall include the irrigation design plan.
    - Prior to issuance of certificate of occupancy, the applicant shall submit documentation of compliance with Development Code Section 18.40.060 (Water Efficient Landscape Ordinance), including all required Water Efficient Landscape Worksheets including Worksheet A (Maximum Allowed Water Allowance) and Worksheet B (Certificate of Completion) for review and approval by the Community Development Director.
    - Prior to issuance of certificate of occupancy, the applicant shall submit to the Planning Division a complete maintenance plan and contract, ensuring proper maintenance of all landscaping and irrigation, to be approved by the Community Development Director. The property owner shall be responsible for maintaining all plantings and irrigation, and in any case where required plantings have not survived, the property owner shall be responsible for replacement with equal or better plant materials.
    - At least one week prior to issuance of a temporary or final certificate of occupancy, the applicant shall request an on-site inspection from the Planning Division for all

landscaping and irrigation, and the applicant shall submit a landscape inspection fee in the amount established by the Town Fee Schedule at the time of the request (currently $306). All landscaping shall be installed in accordance with the final landscape plan and these landscape conditions prior to issuance of a temporary certificate of occupancy OR installation of the landscaping shall be guaranteed by a performance guarantee or other acceptable security prior to issuance of a temporary certificate of occupancy and installation shall be completed prior to issuance of a final certificate of occupancy.

- Maintenance of all plantings and irrigation is required. In any case where required plantings have not survived, the property owner shall be responsible for replacement with equal or better plant materials (***Planning Division Recommendation)***

Other Agency Conditions

61. Sewer lateral from proposed manhole S3 will be required to upsize to 6". TSD will provide 6" wye at sewer main. ***(Truckee Sanitary District)***

62. The project will be subject to the requirements of SB 7 regarding the metering of water usage in multi-family residential structures ***(TDPUD – Water)***

63. The proposed project will be subject to the requirements of AB 1881 and installation of a separate dedicated irrigation meter will be required if the project has 5,000 square feet or more of irrigated landscape. ***(TDPUD – Water)***

64. The Utility Plan included with the routing depicts a connection to an existing water pipe in Winter Creek Loop. There is also an existing point of connection located along the eastern property line. The District will require that the on-site piping loop through the project and connect to both stubs. ***(TDPUD – Water)***

65. Prior to any building or grading permit issuance, the applicant shall pay all AB1600 Mitigation Fees and Quimby Act Fees for all approved residential units as required by the Truckee-Donner Recreation and Park District. The fees shall be based upon the latest fee or fee schedule that was adopted by the Town Council and which is in effect at the time payment is made. ***(TDRPD)***

66. The project location is Timberland as defined by Public Resources Code 4526. The project shall comply with all requirements of CalFire, including, but not limited to, filing a Timber Harvesting Conversion and Timber Harvest Plan or Notice of Conversion Exemption Timber Operations with the California Department of Forestry and Fire Protection. (***CalFire***)

67. The project will likely require the addition of two fire hydrants. ***(Truckee Fire Protection District)***

68. New developments within our District boundaries are required to meet the following conditions:

    a. The Fire District routinely adopts and amends the California Fire Code. New developments are required to comply with the locally adopted and amended Fire Code that is in effect at the time the project is permitted. Complete plans must be

submitted to the Fire District for review and approval Plan Review — Truckee Fire Protection District. The developer will be responsible for plan review fees for both in house plan reviews as well as third party plan reviews conducted to ensure compliance with the locally adopted Fire Code. The developer is required to comply with the Fire District's interpretation of the Fire Code as the authority having jurisdiction. Some typical interpretations include: providing Knox key box access for building control rooms and gates, providing markers, snow removal, and vehicle impact protection for fire hydrants, providing and maintaining pre-fire safety plans for Fire District use and, limiting vertical combustible construction prior to completion of an emergency water supply.

b. The Fire District has adopted a capital facilities mitigation program that applies to new developments. The developer will be required to pay fire mitigation fees at the appropriate rate when the project is permitted.

c. The developer is required to comply with the Fire District's currently adopted defensible space ordinance throughout the life of the project. The Zone 0 "ignition resistant zone" will be in effect after January 1st 2023 for new construction and January 1st 2024 for existing construction

d. Inspections can be scheduled at Inspections — Truckee Fire Protection District

e. Sprinkler plans can be submitted as a deferred submittal to EFS Engineered Fire Systems, Inc.

(Truckee Fire Protection District)

PLANNING COMMISSION RESOLUTION 2024-08

EXHIBIT D

A RESOLUTION OF THE TOWN OF TRUCKEE PLANNING COMMISSION APPROVING APPLICATION 2021-00000060/DP (SILVER CREEK ESTATES)

FINDINGS

DEVELOPMENT PERMIT FINDINGS

1. The proposed development is allowed by Article II (Zoning Districts and Allowable Land Uses) within the applicable zoning district with the approval of the applicable land use permit and complies with all applicable provisions of this Development Code, the Municipal Code and the Public Improvement and Engineering Standards.

   "Multifamily Dwellings, 11 and more units" are a permitted use in the Residential Multifamily (RM) zoning district with approval of a Development Permit as identified by Development Code Table 2-2 (Allowed Uses and Permit Requirements for Residential Zoning Districts). With the incorporation of the Conditions of Approval and application of the SDBL incentives/concessions and waivers/reductions the project is in compliance with the zoning district standards, Development Code, Municipal Code, and PIES. This finding is supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

2. The proposed development is consistent with the General Plan, any applicable Specific Plan and/or Master Plan, the Trails Master Plan, the Truckee Tahoe Airport Land Use Compatibility Plan and the Particulate Matter Air Quality Management Plan.

   With incorporation of the Conditions of Approval, the project is consistent with the 2025 General Plan as supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

   The project is not located within a Specific Plan or Master Plan Area and is not located within a Truckee Tahoe Airport Land Use Compatibility Plan Zone. No trails are required at this location by the Trails and Bikeways Master Plan.

3. The proposed development is consistent with the design guidelines, achieves the overall design objectives of the design guidelines and would not impair the design and architectural integrity and character of the surrounding neighborhood.

   The SDBL allows the project to not meet this finding. The Town is not allowed to apply development standards which preclude the project from building at the permitted density as supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024. The project uses natural (metal/wood) materials which are painted earthtone colors.

4. The Development Permit approval is in compliance with the requirements of the California Environmental Quality Act (CEQA) and there would be no potential significant adverse effects upon environmental quality and natural resources that would not be properly mitigated and monitored, unless a Statement of Overriding Considerations is adopted.

The proposed project is exempt from the provisions of CEQA per the Class 32 exemption for In-Fill Development Projects (Section 15332 of the CEQA Guidelines). The Class 32 exemption can be applied to projects that meet the following criteria:

Consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations

- *With the exception of the allowances required by SDBL, the project is consistent with the General Plan and Development Code. A 2011 case, Wollmer v. City of Berkeley, clarified the use of the CEQA infill exemption for density bonus projects. In this case, an opponent challenged the use of the urban infill exemption on the grounds that the modifications and waivers of development standards, as required to be granted under SDBL, meant that the project was not consistent with existing zoning. The court rejected that argument, finding that the modifications required by the Density Bonus Law did not disqualify the project from claiming the exemption.*

Located within town limits on a project site of no more than five acres and is substantially surrounded by urban uses

- *The project site is under two acres and is substantially surrounded by urban uses.*

Project site has no value as habitat for endangered, rare or threatened species

- *The project site was previously reviewed under the Winter Creek MND. The MND found no habitat on the project site that would have value for endangered, rare or threatened species.*

Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality

- *The project is located in the Residential CEQA VMT (Vehicle Miles Traveled) Exemption Zone and is presumed to have a less-than-signification transportation impact. In order to analyze potential LOS (Level of Service) impacts, the Town required a traffic analysis (Attachment X). The traffic analysis determined the study intersection LOS is adequate and there are no queuing concerns or need for an additional turn lane.*
- *The project will be subject to all standard requirements in regard to air quality, noise and water quality. The project does not include wood burning appliances and will be required to have a dust suppression plan (COA #X). The project meets all stormwater requirements as determined by the Engineering Division (COA #X). The project is required to meet construction noise standards (COA #X) and AB1307 clarifies that the effects of noise generated by the occupants of a development are not a significant effect on the environment per CEQA standards.*

The project can be adequately served by all required utilities and public services.

- *The project has been reviewed by all utilities and public service agencies and final "will-serve" letter are required prior to building permit issuance.*

5. There are adequate provisions for public and emergency vehicle access, fire protection, sanitation, water and public utilities and services to ensure that the proposed development would not be detrimental to public health and safety. Adequate provisions shall mean that distribution and collection facilities and other infrastructure are installed at the time of development and in operation prior to occupancy of buildings and the land and all development fees have been paid prior to occupancy of buildings and the land.

The recommended Conditions of Approval ensure adequate provisions for public and emergency vehicle access, fire protection, sanitation, water, and public utilities and services. All utility agencies have reviewed the project, and no objections were filed. This finding is further supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

6. The subject site is:

   Physically suitable for the type and density/intensity of development being proposed;

   The SDBL allows the project to not meet this finding. The Town is not allowed to apply development standards which preclude the project from building at the permitted density as supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

   Adequate in size and shape to accommodate the use and all fences and walls, landscaping, loading, parking, yards and other features required by this Development Code; and

   The SDBL allows the project to not meet this finding. The Town is not allowed to apply development standards which preclude the project from building at the permitted density as supported by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

   Served by streets adequate in width and pavement type to carry the quantity and type of traffic generated by the proposed development.

   The site is served by public streets adequate in width and pavement type to carry the quantity and type of traffic generated by the proposed development. This finding is supported by the LSC traffic analysis and by the discussion contained in the "Discussion and Analysis" section of the Planning Commission staff report dated May 21, 2024.

7. The proposed development is consistent with all applicable regulations of the Nevada County Environmental Health Department and the Truckee Fire Protection District for the transport, use and disposal of hazardous materials.

   The project does not propose to transport, use or dispose of hazardous materials.
