Tualatin's Draft Community Climate Action Plan

Tualatin Planning Commission meeting October 18, 2023

Overview

- What is the CAP and what will it do?
- Tualatin's future climate & emissions inventory
- Sections & focus areas
- Sample strategies & actions
- Next steps
- Q&A

What is the CAP and what will it do?

- Long term plan
- Includes actions that the community and City can take to:
 - Help people adapt to changing climate conditions (adaptation)
 - Reduce carbon emissions (mitigation)

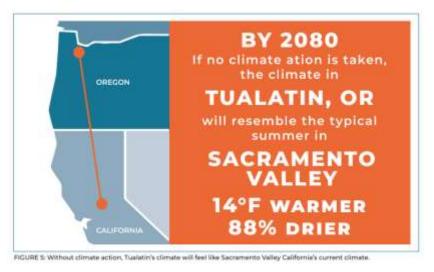

How Tualatin's climate will change

More wildfires and smoke in the region

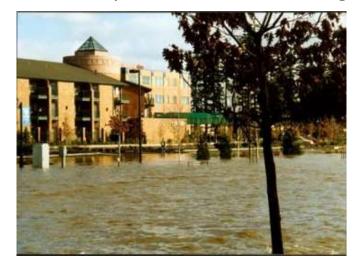

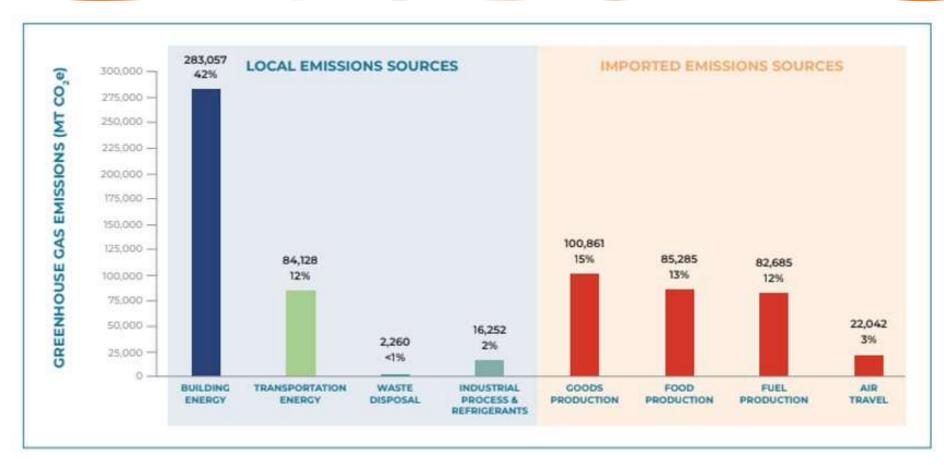

More days over 90 degrees F

More frequent & intense flooding

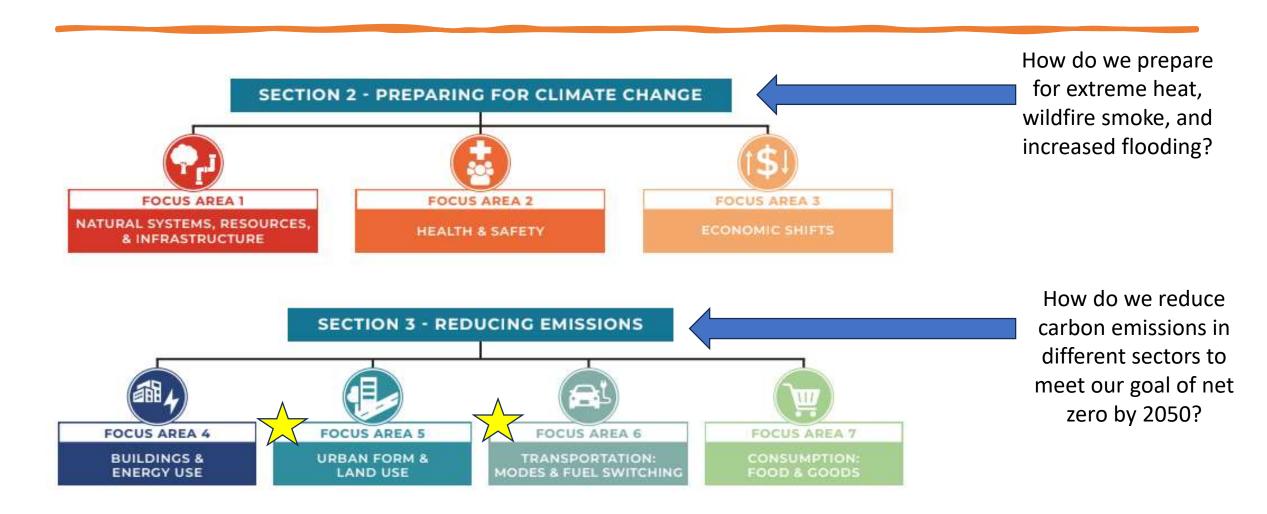

Tualatin's emissions inventory

Local emissions + imported emissions = total emissions
Total emissions = 676,000 MT CO2e

Sections & focus areas

FOCUS AREA 5: URBAN FORM AND LAND USE

Mixed use development

Pedestrian, cyclist, and transit-friendly neighborhoods

FOCUS AREA 5: URBAN FORM AND LAND USE

Strategy 5.2 Urban/community forestry & carbon sequestration

Increase tree canopy

Increase planter width

FOCUS AREA 6: TRANSPORTATION - MODES & FUEL SWITCHING

Fuel switching - Electric vehicles (EVs), renewable diesel, biodiesel, ethanol, and other low-emissions fuels

Establish EV parking & infrastructure requirements at new developments

FOCUS AREA 6: TRANSPORTATION - MODES & FUEL SWITCHING

Prioritize & increase active transportation options and infrastructure

Develop a Complete Streets policy

Next steps

Scan to complete the online open house!

- Online open house
