Tree Board -Urban Forestry.docx

To Whom It May Concern:

My name is Scott Bradley, and I'm very interested in applying for the open seat on the Tumwater Tree Advisory Board (Urban Forestry).

My wife and I recently moved to Tumwater and bought a home here in October of 2025. We moved up from Oakland, California, to retire, and we both wish to be active in the community.

I lived in the Bay Area for 32 years and was an avid hiker and admitted "tree hugger." I was a member of the East Bay Regional Parks for over 20 years. When I moved to the Bay Area, it was important to me to learn about the land, its environment, and its flora and fauna to truly belong there. I feel the same need for connection for the South Puget Sound area.

While in Oakland, I made it a point to learn as many trails as possible in EBRPD's 73-park system, tending to them by removing trash and debris, reporting obstacles or terrain damage. I even lead hikes on lesser-traveled trails for small groups and clubs.

I fell in love with the sequoias, the bay laurels, the madrones, the manzanitas, the Monterey and Coulter pines (with the "widowmaker" pinecones), and the many different species of oak trees (live oak, blue oak, Palmer oak, valley, coast, and canyon oak).

I saw many changes to the region and the climate, with a decade of drought turning a Mediterranean climate into a wildfire-prone area. During that time, I removed my lawn to create a native, drought-tolerant garden landscape that was designated a certified wildlife habitat by the National Wildlife Federation (nwf.org/garden).

I'd love to find ways to make a difference and to help the community keep a healthy canopy and keep the city beautiful. I hope to bring a newcomer's perspective to discussions around tree protection, tree planting, or necessary tree removals. This will also help me learn how to prevent negative environmental changes, what can be done to improve the city's environmental and mental health, and help educate me about the land of my newfound "forever" home, one tree at a time.

I am also a USAF Veteran, a former Crash Firefighter who spent 4 years on flightlines, and I'd be interested in learning how the airport and military mutual aid affect the ecology and the trees here.

Thank you for your consideration!

Scott Bradley

May 3, 2026

Dear City of Tumwater

I am writing to express my interest in joining the Tumwater Tree Board.

I have lived in Tumwater for over 20 years. The trees in our city add to its beauty, health, and fresh air. Protecting the trees in our city corridors and neighborhoods is something all residents should do.

I am a retired federal employee. I have twenty years as a volunteer with the National Park Service at Mt Rainier National Park and four years as a volunteer mountain steward at Mt St Helens. I am also a certified Volcano Naturist. Most of my environmental experience is in wilderness areas. My responsibilities at both Parks is to protect the environment and to educate the public about the parks to include talking about the trees, flora, geology, and animals.

I would appreciate your consideration for a vacancy on the tree board.

Sincerely yours,

Carol S. Campbell
