

Urban Forestry Code Update Tour
July 28, 2026

Route Map

Itinerary

Site No.	Location	Discussion Focus
Start	City Hall	• Purpose of the Tour • Project Overview • Orientation UGA and City Limits
1	Thurston County Readiness Center	• Low impact development including rain gardens • Incompatible land use buffers • Heat impacts
2	Tumwater Corporate Center	• Stormwater facilities • Land use approval under Thurston County • Tree tracts retained • Incompatible land use buffers • Good example of Right Tree, Right Place • Utilities
3	The Preserve Subdivision	• Stormwater facilities • Maintenance Responsibilities • Right Tree Right Place: good and bad examples • Buffers for incompatible use
4	Deschutes Industrial Park	• Largely developed under Thurston County • Redeveloping under Tumwater codes • Municipal Code with street trees, parking islands, landscape buffers • Heat impacts in industrial areas

Urban Forestry Code Update Tour
July 28,2026

5	Kyodi Subdivision and Henderson Drive	• Critical areas with wetland buffer retained • Balance between lot trees and tree tracts • Tree in Right-of-Way upheaving the sidewalk • City responsible for maintenance
6	Stop: Brewery District	• Lack of street trees • Right-of-way competition • Redevelopment at Craft District provided median and street trees
7	Kirsop Road	• Wetland buffer protects trees from removal • Wetlands compatible with residential development
8	Gold Creek Development	• Critical area buffers • Mature trees due to neighborhood age • Tree tracts retained
9	Bronington Drive Subdivision	• Coolest area of the City according to WRS sensor data • Leaf litter increases costs for stormwater infrastructure maintenance and community outreach
10	Multifamily: Sequioa Landing & Yorkshire Apartments	• Low impact development • Privacy buffers of retained naturalized vegetation • Developer redesigned site plan to retain larger tree tracts
