PROJECT NO.

NEW: No PRIOR: WA-03

PROGRAM TITLE: Water Rights Acquisition

PROGRAM DESCRIPTION:

This project reserves funding for the purchase and processing of existing water rights, as opportunities become available, to support system growth demands. While the timing of acquistions is opportunity-dependent, larger reserves are allocated for earlier years to support known opportunities.

IS PROJECT RECOMMENDED BY PLAN/POLICY? Yes PLAN: Water System Plan PAGE# S-3 GROWTH: 100%

PROGRAM TITLE: Brewery Wellfield - Water Production Infrastructure

PROGRAM DESCRIPTION:

This project provides funding for the development of water production infrastructure necessary to put to beneficial use the water rights acquired from the former Brewery. Wells are expected to be designed and tested beginning late 2025 through 2026. The treatment plant is anticipated to be designed and permitted in 2026 with construction completing in 2028.

PROJECT NO.

NEW: No PRIOR: WA-04

PROGRAM TITLE: Emerging Projects / Oversizing

PROGRAM DESCRIPTION:

This funding will be utilized to react to development projects by providing funds for such items as completing "loops" to increase flows, system redundancy, and oversizing costs. Could also be used to fund water line improvements and replacements within City street projects in order to avoid road cuts following road resurfacing.

PROGRAM TITLE: Water Main Replacement and Extension Program

PROGRAM DESCRIPTION:

This program aims to replace aging water mains and associated infrastructure in the system, including main replacements on roadways in coordination with other utility, road, or development projects that may not have been previously identified as specific replacement projects. Projects may be combined for efficiency and staffing workload, and not necessarily completed on an annual basis. Projects funded by this program shall be tracked for compliance with WA Department of Health requirements and integrated into the City's comprehensive plan updates.

PROJECT NO.

NEW: NO

PRIOR:

PROGRAM TITLE: Well 15 Improvements

PROGRAM DESCRIPTION:

Well #15 is the City's second largest producer, sited on property owned by the Port of Olympia through a perpetual easement. Infrastructure supporting, surrounding, and securing Well 15 is significantly below City standards for production sites. Recent corrosion control evaluations resulted in Well 15 being required by the Washington Department of Health (DOH) to increase corrosion control treatment by August 2026. Aeration treatment will raise the pH to 7.8 to 8.0 for water quality optimzation. This project will also enhance site security and auxillary power, update infrastructure to current standard.

*Referenced by: 2020 Water System Plan / 2021 Homeland Security Assessment / 2023 Corrosion Control Memo / DOH Approval Letter

PRIOR:

PROGRAM TITLE: Public Works Facility (2025 Update)

PROGRAM DESCRIPTION:

Construction of a new Public Works Facility at the City's Trails End Drive property. The new facility will house the Transportation and Engineering and Water Resources and Sustainability departments. The relocation of these departments will partially offset City Hall space constraints and allow for future implementation of the Tumwater Civic Center Master Plan. Site costs are distributed approximately 33% General Fund, 28% Water, 22% Sewer, and 17% Storm. Offsite mitigation costs are distributed 50% Transportation CFP, 19% Water, 18% Sewer, and 13% Storm. Cost distribution is based on allocation of resources. Construction is presumed to be financed over 20 years, debt service to be included in the budget. Expenses and sources shown below are for Water only.

PROJECT NO.

NEW: No PRIOR: WA-13

PROGRAM TITLE: Southeast Reservoir & System Extension

PROGRAM DESCRIPTION:

This project would design and construct a new 3.0 Million Gallon reservoir south of 93rd Avenue on property that has been previously acquired for this purpose. The project will also include the piping necessary to extend the City water system along 93rd Avenue to the reservoir from the Preserve development. Construction of the project is assumed to be funded with a revenue bond or Public Works Trust Fund Loan.

PROGRAM TITLE: Enterprise Resource Planning Business System

PROGRAM DESCRIPTION:

Replacement and implementation of the current ERP System (Tyler Eden), currently estimated at approximately \$2.6 million. Tyler Technology's, Eden program, is no longer supported and is being upgraded to MUNIS. This system manages the billing and financial programs for the utilities, among other critical functions for the City, like payroll and permitting. The cost for both vendor fees, technology, and City staff time to implement is split between General Fund (50%) and the Water, Sewer and Storm utilities (50%).

PROGRAM TITLE: Water Comprehensive Plan Update

PROGRAM DESCRIPTION:

The WA Department of Health (DOH) requires the City update the Water System Comprehensive Plan every ten years. The current plan, completed in 2021, will need to be updated and approved by DOH by November 2031. The Water Comp Plan update includes an assessment of water rights and production capacity, treatment needs, and distribution system. The report also reviews the City's wellhead protection, water conservation, and water quality programs, makes recommendedations for capital improvements and ensures the City has financial resources to implement the plan and protect public health.

PROGRAM TITLE: Capitol Blvd and X St Watermain

PROGRAM DESCRIPTION:

This project will upsize existing 8-inch AC (asbestos cement) watermain along Capitol Blvd with 16-inch ductile iron pipe in conjunction with a Transportation Capital Facilities Plan project. Undersized cast iron watermain on X Street within project limits will also be replaced. Infrastructure upgrades along Capitol Blvd are consistent with seismic protection recommendations. Design is complete and right-of-way negotiations are underway. Construction is tentatively scheduled for construction in 2026.

PROGRAM TITLE: Seismic Resilience

PROGRAM DESCRIPTION:

Conduct a moderate seismic resiliency study to establish Level of Service goals for utility operation after a major seismic event, update geotechnical hazard maps, develop processes for facility structural resilience evaluations on critical structures and distribution systems, and prepare a critical interdependencies assessment. This project will result in the development of an implementation strategy, identifying all the recommendations for reducing vulnerabilities and mitigating risk for both water and sewer utilities. This is the Drinking Water Fund portion.
