RE: WatchGuard Video Sole Source Request

Council approval is being requested for the sole source procurement of a new Video Management server from WatchGuard Video. The current systems has gone “End of Life” and is no longer supported.

This sole source procurement request is necessitated by the desire to keep our entire support structure under the manufacture of the following systems: 4RE In-Car Systems, High Fidelity Microphones, and VISTA wearable cameras.

Please let me know if you have any questions.
