Overview: The colonial estates lift station is a duplex submersible lift station with a capacity of 675 gallons per minute. The colonial estates lift station receives gravity sewer flow from the northwest portion of the city, and conveys the flow through 14,524' of pressure sewer line where the flow is again transferred through gravity flow. Many new residents in this lift stations service area have been constructed, resulting in an increased inflow to the station. The colonial estates lift station is overloaded and has reached the end of its useful service life. It has become very unreliable, requiring frequent attention. This station needs to be upsized and fully rehabilitated.
