

Electric Utility Update- 10/15/2026

Power line drone inspection - As discussed previously with the Utility Committee, the Electric Utility has explored using newer technology for pole and power line inspections. Staff recently joined WPPI for a line inspection between Woodland Dr. and Madison St. This line runs parallel to Memorial Dr. and follows the former train tracks. In recent months, this line segment has experienced damage from multiple storms and high winds. Crews will be able to better evaluate the condition of these facilities and make any needed repairs.

Two Rivers Utilities Annual Food Drive - The Two Rivers Utilities is once again asking residents to participate in the annual food drive. November 2nd through November 13th. Residents are asked to donate three non-perishable food items and in return, they can select to receive a set of Christmas lights or an energy-efficient light bulb. Donors will also be automatically entered into a random drawing for additional prizes. Drop off locations are City Hall Customer Service or the Electric Department Office. Please see the attached flyer.
