Memorandum

Department of Public Works

Date: November 10, 2026

To: City Council

From: Matthew R Heckenlaible, PE City Engineer / Public Works Director

Re: 11th Street Proposed Parking Restriction Modification between Lowell Street and Bellevue Place

At the October Public Works Committee meeting, representatives from Two Rivers Bus Company requested modified parking restrictions adjacent to Koenig Elementary School. The proposed request would impact parking on the north side of 11th Street from Lowell Street to Bellevue Place.

The current parking restriction on 11sth Street from Lowell Street to Buchholz Street is "No Parking School Days 7:30 AM -4:30PM Loading and Unloading Permitted", which means although there is a restriction, vehicles can and do park there to drop off and pick up students. This zone is identified as the purple line in the screenshot below. This causes a 'narrower' roadway for the buses turning from Lowell Street onto westbound 11th Street.

TWO RIVERS WISCONSIN

The request is to modify the section from Lowell Street to the Koenig School driveway exiting onto 11th Street to be "No Parking" with no exceptions. This is identified as the red line in the screenshot above.

They would also like to modify the parking restrictions between the school driveway and Buchholz Street to be consistent with the parking restriction to the west of Buchholz Street (orange line above), "No Parking School Days 7:30 AM - 4:30 PM Bus Loading and Unloading Only" rather than a loading and unloading zone for parent/guardians use (existing purple line above).

This proposal removes about 110 feet of parent/guardian loading & unloading zone and replaces with full No Parking restrictions, no exceptions from Lowell to the school driveway, and replaces approximately 140 feet of parent /guardian loading & unloading zone with bus loading and unloading zone.

The Public Works Committee took affirmative action in October to send this proposal to the Full City Council for formal action at a November meeting. The Two Rivers School District was consulted and are in favor of these proposed parking restriction modifications.
