DRILLED WELLS: Middle Georgia Water Systems does not guarantee the quality of water. The rock, or earth formation, determines the water quality. The land owner will be responsible for providing a way for our equipment and service vehicles to ingress or egress to the well site. Middle Georgia Water Systems will not be responsible for any land washing accumulation of rock dust or damage to property due to normal drilling operations.

To whom it may concern:

This is a quote to fill in water well. If the well is a drilled well the cost is 2500.00. If the well is a bored well the cost to fill it in will range from 3500.00 to 4500.00 depending on the amount of rock we will have to purchase 3500.00 if we only have to get one load of rock and 4500.00 if we have to get two loads of rock.

Thank you,

Tim Knight
