Galvalume & Galvalume Plus

Galvalume® and Galvalume Plus®, which Englert offers exclusively, are produced by coating steel with a special Aluminum-Zinc alloy that provides more than twice the corrosion resistance of galvanized steel by delivering the optimum combination of the features of aluminum and zinc.

Our Galvalume steel, available in 22, 24 and 26-gauge coil or sheet, is an ideal roofing material because of its strength, extraordinary outdoor corrosion resistance and longevity.

Galvalume is offered in both bare and pre-painted versions. Galvalume Plus is the same bare Galvalume product with a thin, clear acrylic coating. Galvalume Plus can be roll-formed dry without vanishing oil, making it much easier to form and install safely.

CLASSIC SLIDING PATIO DOOR

FEATURES

- 1 Pre-punched nailing fin with fusion-welded corners for simple and accurate installation
- 2 Interior and exterior accessory groove for drywall return, extension jamb and exterior brickmould application
- 3 Maintenance-free multi-chamber PVC construction with fully welded corners for weather-tight performance
- 4 Self-centering interlock satisfies forced entry requirements
- 5 3/4" IGU tempered glass systems with energy-efficient Warm Edge (standard) or Warm Edge+ (optional upgrade) available in Low-E or HP tempered glass package options (see page 12 for details)
- 6 Field reversible panels for simple on-site conversions (8-0 height is not reversible)
- 7 Simple roller adjustment access through end of panel ensures smooth operation
- 8 Aluminum threshold and sill track for enhanced durability

One door opens up all kinds of possibilities. Our Classic sliding patio doors feature a unique design that allows for simple field reversibility before or even after installation. They are constructed with full-perimeter weatherstripping for a tight and consistent seal. Plus, you can pick from a variety of optional features including exterior handles with or without a keyed lock, coastal hardware or an ADA compliance kit for 6-0 wide doors with an ADA handle and ramps, and coastal hardware.

A

Maintenance-free multi-chamber PVC construction with fully welded corners for weather-tight performance

C

Simple roller adjustment access through end of panel ensures smooth operation

B

Self-centering interlock satisfies forced entry requirements

D

Aluminum threshold and sill track

1. Optional Warm Edge+ spacer upgrade for enhanced performance. 2. Optional Low-E glass packages for better performance, see page 12 for details. 3. Optional HP glass packages combines Low-E with argon gas fill for high performance, see page 12 for details. 4. Impact Rated units are available in select sizes and configurations, see page 14 for details. 5. Optional coastal hardware available. 6. Americans with Disabilities Act (ADA) compliant accessibility upgrade package available.
