

The Health Department currently operates several outreach programs that provide critical health services to our community. However, the existing facilities and spaces are becoming increasingly limited in their ability to meet the demand for these services. An additional lot and building would provide the necessary room to expand these programs, ensuring accessibility to the community. Specifically, the new lot and building would allow for:

- **Car Seat Checks:** Space for trained professionals to educate parents and caregivers on the correct installation and use of car seats, helping ensure child passenger safety.
- **Drive-through Immunization Clinics:** A safe, efficient environment for residents to receive immunizations without the need to leave their vehicles, especially beneficial for those with mobility challenges or time constraints.
- **Other Health Department Programs:** Additional space would allow for the seamless operation of and storage for various health programs as space becomes limited in our current building.

Benefits to the Community:

The allocation of a new lot and building for Health Department use will provide numerous benefits to the community, including:

- **Increased Access to Health Services:** More space will allow for greater participation in vital health programs, especially for those who may otherwise face barriers to access.
- **Improved Public Health Outcomes:** By offering easier access to services like immunizations and child safety education, the community will see improved overall health and safety.
- **Enhanced Community Engagement:** The expanded capacity will support the Health Department's goal of reaching more residents and meeting their health needs in a timely and efficient manner.

The need for additional space to support the Health Department's critical programs has become urgent. The proposed lot and building would significantly enhance our ability to serve the community and contribute to the health and well-being of our residents.
