To whom it may concern;

Ken Berg has brought before me the idea of a multi-family complex being built to the west of the Piggly Wiggly in Watertown, WI; a business that I own. I think bringing in more residential would be very beneficial for the development of the east side of Watertown.

I fully support this effort as long as one entrance/exit is located onto the frontage road, but not connected to a second one that would use my parking lot. This would cause too much cross traffic and cutting through, creating what I think would be hazardous to my customers.
