Subject: Addition of cameras in strategic locations and modifying current views inside facility

Background

Jamie and I met with a representative from Complex Solutions regarding adding cameras and modifying recording angles to cameras already installed inside and outside of the facility. I hope to have a proposal by the scheduled meeting

Budget Goal

Financial Impact

Funds would come from donations or construction account

Recommendation

I wasn't expecting to have to upgrade the server so this cost is higher than expected. I believe more cameras need to be added but I can cut the number down. Any additional cameras would require an upgrade to the server.
