M 2/W2

Bring in porto's for events

No festivals

You will pay for it in the long run with higher cleaning cost due to over use, spending more money on portopotties and additional cleaning crew, it will add up. Do you want to pay more on the front end or back end, you will pay more on the back end for sure. Corn Fest - Rent 50 porto units in addition to restroom use. Can lock stalls if needed but very hard to add on after the building is built.

M 7/W 7

Family size each side

Used for festivals

I believe architects base it off of the occupancy of the shelters.

John Neumann - Director of Parks & Forestry

For the amount of potential that could be at that park, I would not deviate from that plan. I wouldn't want to go less than that. 26 year tenure, #1 problem in all my parks are number of facilities available.
