Waterway and Wetland General Permit Application General Information

		General Information				
Project Informat	on					
Project Name:	Jefferson County Snowmobile Bridge Watertown Airport, S-5565					
		After-the-fact application for permits or approvals submitted after work has been ommenced or completed.				
Start Date:	2/1/2023	(Anticipated)				
End Date:	2/1/2024	(Projected)

	ve or non-nati	ive species management				
□ Dredging - Instal□ Dredging - Jetting						
		n a drainage district				
_		viously dradged area				

□ Dredging - Invasive or non-native species management
 □ Dredging - Installation of utility crossing(s)
 □ Dredging - Jetting aquatic plants
 □ Dredging - Maintenance within a drainage district
 □ Dredging - Maintenance of previously dredged area
 □ Dredging - Man-made Impoundments - Group or Association
 □ Dredging - Remove accumulated plant and animal nuisance deposits
 □ Dredging - Small scale
 □ Dredging - Stream (less than 25 yards)
 □ Dry Fire Hydrant
 □ Grading
 □ Habitat Structure - Fish Habitat and Stocking Structures
 □ Habitat Structure - Stream habitat projects designed by government agencies
 □ Habitat Structure - Wildlife nesting structure

☐ Intake or outfall structure

	☐ Lake shore erosion control - Biological
Lake shore erosion control − Riprap replacement Lake shore erosion control − Seawall replacement Lake shore erosion control − Seawall replacement with riprap Pea gravel blanket Pilings Pond - Landscape Pond - Storm Water pond Pond - Wildlife pond Stream bank erosion control − Bio-stabilization Stream bank erosion control − Integrated bank protection Stream bank repair of riprap (placed prior to August 1, 2007) Stream bank resoion control − Replacement of structure with bio-stabilization Stream bank resoion control − Replacement of structure with bio-stabilization Stream bank resoion control − Replacement of structure with integrated bank treatment Temporary waterway crossing for forest management activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Waterway Crossings − Culverts, Clear-Span Bridges, and Fords The application checklist identifying critical design requirements can be found at https://dnr.wi.gov/files/pdf/forms/3500/3500-130.pdf for you to review as you work to complete your permit application submittal. Please print, sign and attach this checklist on the attachment tab. If your crossing design utilizes a clear span bridge or a ford crossing, please upload an attachment indicating the type of structure being proposed. If your crossing design includes a culvert, please upload supporting information used to inform culvert design, such as the culvert sizing worksheet, or other methods as referenced in the permit application checklist. Waterway and Wetland Conservation Activities Wetland conservation - Federal Wetland onservation - Foderal Wetland disturbance - Wetlands established incidental to construction Wetland disturbance - Recisidential / industrial / commercial development Wetland disturbance - Recisidential / industrial / commercial development	☐ Lake shore erosion control – Riprap
Lake shore erosion control − Seawall replacement Lake shore erosion control − Seawall replacement with riprap Pea gravel blanket Pilings Pond - Landscape Pond - Storm Water pond Stream bank erosion control − Bio-stabilization Stream bank erosion control − Integrated bank protection Stream bank repair of riprap (placed prior to August 1, 2007) Stream bank resoison control − Replacement of structure with bio-stabilization Stream bank erosion control − Replacement of structure with integrated bank treatment Temporary waterway crossing for forest management activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Waterway Crossings − Culverts, Clear-Span Bridges, and Fords • The application checklist identifying critical design requirements can be found at https://dnr.wi.gov/files/pdf/forms/3500/3500-130.pdf for you to review as you work to complete your permit application submittal. • Please print, sign and attach this checklist on the attachment tab. • If your crossing design utilizes a clear span bridge or a ford crossing, please upload an attachment indicating the type of structure being proposed. If your crossing design includes a culvert, please upload supporting information used to inform culvert design, such as the culvert sizing worksheet , or other methods as referenced in the permit application checklist. Waterway and Wetland Conservation Activities Wetland Activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Wetland Onservation - Not federal Wetland disturbance - Wetlands established incidental to construction Wetland disturbance - Wunicipal Development Wetland Discharge Wetland disturbance - Municipal Development Wetland Discharge Wetland disturbance - Residential / industrial / commercial development The information included in these attachments is necessary for a complete application. A complete submittal with detailed drawings will	☐ Lake shore erosion control – Riprap repair
Lake shore erosion control – Seawall replacement with riprap Pea gravel blanket Pilings Pond - Landscape Pond - Landscape Pond - Storm Water pond Pond - Wildlife pond Stream bank erosion control - Bio-stabilization Stream bank erosion control - Integrated bank protection Stream bank erosion control - Replacement of structure with bio-stabilization Stream bank erosion control - Replacement of structure with bio-stabilization Stream bank erosion control - Replacement of structure with hitegrated bank treatment Temporary waterway crossing for forest management activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Waterway Crossings - Culverts, Clear-Span Bridges, and Fords The application checklist identifying critical design requirements can be found at https://dnr.wi.gov/files/pdf/forms/3500/3500-130.pdf The application submittal. Please print, sign and attach this checklist on the attachment tab. If your crossing design utilizes a clear span bridge or a ford crossing, please upload an attachment indicating the type of structure being proposed. If your crossing design includes a culvert, please upload supporting information used to inform culvert design, such as the culvert sizing worksheet, or other methods as referenced in the permit application checklist. Waterway and Wetland Conservation Activities Wetland conservation - Federal Wetland conservation - Federal Wetland Discharge for Dam Repair / Reconstruction / Maintenance Wetland disturbance - Wetlands established incidental to construction Wetland disturbance - Recisidential / industrial / commercial development Wetland disturbance - Recisidential / industrial / commercial development Wetland included in these attachments is necessary for a complete application. A complete submittal with detailed drawings will	☐ Lake shore erosion control – Riprap replacement
Pea gravel blanket Pilings Pond - Landscape Pond - Storm Water pond Pond - Wildlife pond Stream bank erosion control - Bio-stabilization Stream bank erosion control - Integrated bank protection Stream bank erosion control - Replacement of structure with bio-stabilization Stream bank erosion control - Replacement of structure with bio-stabilization Stream bank erosion control - Replacement of structure with integrated bank treatment Temporary waterway crossing for forest management activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Waterway Crossings - Culverts, Clear-Span Bridges, and Fords The application checklist identifying critical design requirements can be found at https://dnr.wl.gov/files/pdf/forms/3500/3500-130.pdf for you to review as you work to complete your permit application submittal. Please print, sign and attach this checklist on the attachment tab. If your crossing design utilizes a clear span bridge or a ford crossing, please upload an attachment indicating the type of structure being proposed. If your crossing design includes a culvert, please upload supporting information used to inform culvert design, such as the culvert sizing worksheet, or other methods as referenced in the permit application checklist. Waterway and Wetland Conservation - Federal Wetland conservation - Federal Wetland disturbance - Wetland, Dredging, Driving on the Bed Wetland disturbance - Wetlands established incidental to construction Wetland disturbance - Wetlands established incidental to construction Wetland disturbance - Residential / industrial / commercial development Wetland disturbance - Recreational development	☐ Lake shore erosion control – Seawall replacement
Pilings Pond - Landscape Pond - Storm Water pond Pond - Wildlife pond Stream bank erosion control - Bio-stabilization Stream bank erosion control - Integrated bank protection Stream bank erosion control - Integrated bank protection Stream bank erosion control - Replacement of structure with bio-stabilization Stream bank erosion control - Replacement of structure with integrated bank treatment Temporary waterway crossing for forest management activities Utility Structure, Bridge, Wetland, Dredging, Driving on the Bed Waterway Crossings - Culverts, Clear-Span Bridges, and Fords The application checklist identifying critical design requirements can be found at https://dnr.wi.gov/files/pdf/forms/3500/3500-130.pdf for you to review as you work to complete your permit application submittal. Permittee Contact Information - Complete

Landowner / Applicant Information

Notice: Pursuant to chs. 30 and 31, Wis. Stats., ch. 281, Wis. Stats, and s. 283.33, Wis. Stats., this form is used to apply for coverage under the state construction site storm water runoff general permit, and to apply for a state or federal permit or certification for waterway and wetland projects or dam projects. This form and any required attachments constitute the permit application. Failure to complete and submit this application form may result in a fine and/or imprisonment or forfeiture under the provisions of applicable laws including s. 283.91, Wis. Stats. Personal information collected will be used for administrative purposes and may be provided to requesters to the extent required by Wisconsin's Public Records Laws (ss. 19.31-19.39, Wis. Stats.). This form is required for U.S. Army Corps of Engineers (ACOE) regulatory purposes pursuant to 33 CF 325.

CULVERT SIZING

23.80

To be eligible for a general permit without a professionally engineered culvert design, the required culvert area may not exceed 20 square feet. To be eligible for a general permit with a professionally engineered culvert design, the required culvert area may not exceed 40 square feet.

Calculating Culvert area

To determine the required culvert area, 3 measurements should be made: channel width of the stream in feet at the ordinary high water mark (W1), channel width of the stream in feet at the stream bottom (W2), and the height in feet of the ordinary high water above the stream bottom (H) (see diagram). These 3 measurements are made at each of 3 locations or transects along the stream: the location of the proposed crossing, 100 feet upstream from the crossing, and 100 feet downstream from the crossing. The individual measurements of W₁, W₂ and H are averaged to derive the final W₁, W₂ and H values. The required culvert area is then calculated with the following equation:

60

Required Culvert area (square feet) = $H \times (W_1, W_2)$

19.60

Height:	* (W1: + W2) =Culvert area (s	sq ft) 0
Culvert area (sq ft)	Culvert diameter (in.)	Culvert area (sq ft)	Culvert diameter (in.)
1.80	18	3.10	24
4.90	30	7.10	36
9.60	42	12.60	48
15.90	54	19.60	60

66

Required Attachments and Supplemental Information - Complete

Please recognize that you are responsible for obtaining all necessary local (e.g. city, town, village or county) and U.S. Army Corps of Engineer permits or approvals in addition to any applicable state permits prior to commencing any work at the project site.

All payments are collected by US Bank which is an external website contracted by the Wisconsin Department of Natural Resources for the sole purpose of collecting payments over the web.

Note for Applicants or Agents Sharing Application: If you do not intend to share or sign and submit this application now, press the "Save" icon in the top menu prior to closing the application. If you close the application with out saving, your payment status updates may not be retained

Sign and Submit

Steps to Complete the signature process

- 1. Read and Accept the Terms and Conditions
- 2. Press the Submit to the DNR button

You will receive an acknowledgement email upon completing these steps.

Terms and Conditions

Certification: I hereby certify that I am the owner or authorized representative of the owner of the property which is the subject of this Permit Application. I certify that the information contained in this form and attachments is true and accurate. I certify that the project will be in compliance with all permit conditions. I understand that failure to comply with any or all of the provisions of the permit may result in permit revocation and a fine and/or imprisonment or forfeiture under the provisions of applicable laws.

Permission: I hereby give the Department permission to enter and inspect the property at reasonable times, to evaluate this notice and application, and to determine compliance with any resulting permit coverage.

NOTE: For security purposes all email correspondence will be sent to the address you used when registering your WAMS ID. This may be a different email than that provided in the application. For information on your WAMS account click HERE.

Authorized Signature

✓ I accept the above terms and conditions.

Signed by: i:0#.f|wamsmembership|kwiesmann on 2023-01-30T14:...

After providing the final authorized signature, the system will send an email to the authorized party and any agents. This email will include a copy to the final read only version of this application.
