Aging Infrastructure

Challenging for cities and homeowners

Lateral lines are subjected to the same elements as public lines

- Ground shifting, fluctuating temperatures, tree root penetration, corrosion, and more

Out of sight, out of mind

- Water and sewer lines located outside, usually underground

Failed lines waste thousands of gallons of water

- Presents a potential environmental hazard

Common homeowner misconceptions

- City is responsible for maintenance of the water and sewer lines on their property
- Repairs are covered by their homeowner's policy

Homeowners are unprepared for emergencies and expect solutions from the city/utility

78% of homeowners believe the utility provider should educate them on repairs and preventative measures. (Ipsos Public Affairs/HomeServe 2019)

56% of Americans can't cover a \$1,000 emergency expense with savings. (Bankrate 2022)

60% of homeowners with annual household incomes under \$50,000 a year reported **having \$500 or less or no money set aside** for a home repair emergency. (Harris Poll/HomeServe 2021)

Solution for Municipalities and their Residents

Residents

Optional low-cost protection against potentially expensive water, sewer, plumbing repairs

Educates residents about their responsibility for exterior lines

Municipality/Utility

Reduces calls to the Utility

Timely repairs reduce water loss from line breaks - use of local contractors infuses money into the local economy

Turnkey program - provides marketing, billing, claims, customer service

No cost for the municipality/utility to participate
