PERFORMANCE HEARING / PUBLIC NOTICE #3

The Ouachita Parish Police Jury will hold a Public Hearing to obtain citizens' views and to respond to questions relative to the Parish's performance on its FY-2020 LCDBG Water Project (Project #2000527670). The meeting will be on Wednesday, October 19, 2022 at 2:00 P.M. in the Ouachita Parish Police Jury Office - 2nd Floor Ouachita Parish Courthouse.

The Louisiana Community Development Block Grant Program (LCDBG) has established four (4) major goals (objectives) for Community Development Programs:

- A. Strengthen community economic development through the creation of jobs, stimulation of proven investment, and community revitalization, principally for low and moderate-income persons.
- B. Benefit low-moderate income persons.
- C. Eliminate or aid in prevention of slums or blight.
- D. Provide for other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available to meet such needs.

This Public Hearing will include a discussion of Parish's performance on their FY-2020 LCDBG Water Project; the amount of funds expended, the benefit to low/moderate income persons, and related Project outcomes. Project records are on file at the Parish Courthouse and may be reviewed by citizens each working day during regular working hour.

All residents of Ouachita Parish are invited to attend this Hearing and to review Project Performance and to express their views and make comments both written and verbal on all aspects of the program and the Project. Written comments can be sent to Shane Smiley, President, P. O. Box 3007, Monroe, LA 71210. Facilities for the handicapped will be provided, as will interpreters for non-English speaking persons. All citizens of Ouachita Parish are encouraged to attend and participate, particularly low/moderate income persons. Comments must be received by October 19, 2022. 10/6

who drink water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

In December 1998, EPA set enforceable drinking water standards for TTHMs at 80 parts per billion (ppb) and for HAA5 at 60 parts per billion (ppb) to reduce the risk of cancer or other adverse health effects. Compliance with the TTHMs and HAA5 standard for public water systems serving less than 10,000 individuals initially became effective and enforceable on January 1, 2004. Compliance with the TTHM standards is determined by calculating a locational running annual average (LRAA) of quarterly TTHMs sample results. Compliance calculations performed for the third quarter of 2022 show that the system's current TTHMs LRAAs are 92 ppb at DBP01 - 115 Dolly Drive; Thus, the system is currently in violation of the TTHMs standard.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This is not an emergency. If it had been, you would have been notified immediately. EPA and LDH do not consider this violation to have any serious adverse health effects on human health as a result of short-term exposure; however, continued long term exposure to TTHMs and HAA5 levels above the standard (e.g., 20 years of exposure) has the potential to have serious adverse effects on human health.

This system purchases its water from Better Waterworks.

(PWS ID No. LA1073090)

The Lincoln Hills Subdivision Water System is currently in violation of the maximum contaminant level (MCL) for total trihalomethanes as set forth by the State [Part XII of the Louisiana State Sanitary Code (LAC 51: XII)] and the Federal Primary Drinking Water Regulations (40 CFR Part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people

NOTICE TO WATER CUSTOMERS

SOUTH MONROE WATER SYSTEM

9/26/2022

(PWS ID No. LA1073046)

The South Monroe WS is currently in violation of the maximum contaminant level (MCL) for total trihalomethanes (TTHMs) as set forth by the State [Part XII of the Louisiana State Sanitary Code (LAC 51: XII)] and the Federal Primary Drinking Water Regulations (40 CFR Part 141).

The United States Environmental Protection Agency (EPA) and the Louisiana Department of Health (LDH) set drinking water standards and requires the disinfection of drinking water. Where disinfection is used in the treatment of drinking water, disinfectants combine with naturally occurring organic and inorganic matter present in water to form chemicals called disinfection byproducts (DBPs). EPA and LDH set standards for controlling the levels of disinfectants and DBPs in drinking water, including trihalomethanes (THMs) and haloacetic acid (HAAs). Some people who drink water containing THMs in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

In December 1998, EPA set enforceable drinking water standards for TTHMs at 80 parts per billion (ppb) and for HAA5 at 60 parts per billion (ppb) to reduce the risk of cancer or other adverse health effects. Compliance with the TTHMs and HAA5 standard for public water systems serving less than 10,000 individuals initially became effective and enforceable on January 1, 2004. Compliance with the TTHMs standard is determined by calculating a locational running annual average (LRAA) of quarterly TTHMs sample results. Compliance calculations performed for the third quarter of 2022 show that the system's current TTHMs LRAA is 85 ppb at DBP05 - 328 Audubon; thus, the system is currently in violation of the TTHMs standard.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This is not an emergency. If it had been, you would have been notified immediately. EPA and LDH do not consider this violation to have any serious adverse health effects on human health as a result of short-term exposure; however, continued long term exposure to TTHMs and HAA5 levels above the standard (e.g., 20 years of exposure) has potential to have serious adverse effects on human health.

Should you have any questions regarding this notice, please contact the office at (318) 322-3741.

Notice Issued: October 13, 2022

This notice shall satisfy two separate but related procedural notification requirements for activities to be undertaken by the Louisiana Housing Corporation, as well as satisfy two comment periods between LHC and HUD.

REQUEST FOR RELEASE OF FUNDS. On or about October 31, 2022, the LHC will submit a request to HUD for the release of funds under the Allocations, Waivers and Alternative Requirements for Grantees Receiving Community Development Block Grant Disaster Recovery Funds in Response to Disasters Occurring in 2016, The Continuing Appropriations Act, 2017, The Further Continuing and Security Assistance Appropriations Act, 2017, and The Consolidated Appropriations Act, 2017 (Public Law 114-223, 114-254 and 115-31) Federal Register Docket No. FR-5989-N-01, FR-6012-N-01 and FR-6039-N-01, for the purpose of the demolition of a single-family home and the construction of 2 multifamily units at 4007 Halsell St. Monroe, Ouachita Parish, Louisiana 71203. Project issues: the potential for earthwork to expose cultural or historically significant resources and lead based paint/asbestos. Mitigation: an inadvertent discovery clause that will be appended to all contractual documents and encapsulation and/or abatement for the contaminants. HUD's Lead Safe Housing Rule under 24 CFR Part 35 will also be followed. The total amount requested for funding is \$250,000.00 CDBG-DR funds.

FINDING OF NO SIGNIFICANT IMPACT: LHC has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. An Environmental Review Record (ERR) that documents the environmental determinations for this project is on file at LHC, 11637 Industriplex Blvd. Baton Rouge, LA 70809, (225) 754-1450 and may be examined or copied weekdays 8 a.m. to 4:30 p.m.

PUBLIC COMMENTS: Any individual, group, or agency disagreeing with this determination, or wishing to comment on the project may submit written comments to this office by mail to the LHC environmental department at 11637 Industriplex Blvd. Baton Rouge, LA 70809 or by email to Agatha.Bras@lhca.gov. All comments received by October 28, 2022 will be considered by this office prior to authorizing submission of a request for release of funds. Commenters should specify which part of this notice they are addressing.

RELEASE OF FUNDS: This Office certifies to HUD that Joshua G. Hollins in his capacity as Executive Director, consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. HUD's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities,
