

NOTICE OF MARC/KCRPC CONTRACT RENEWAL

DATED: March 17, 2025

Bid Title: Solid Waste Residential Disposal Services
Bid/Contract No. RFP 78 (2R)
Contract Modification No.: 2
Contract Period: January 1, 2018 to December 31, 2020
Renewal Period: January 1, 2021 to December 31, 2025
Renewal Period: January 1, 2026 to December 31, 2030

CONTRACTOR:

Mr. Tom Coffman
GFL Environmental Inc.
22820 S. State Route 291
Harrisonville, Mo., 64701

Phone: 816-787-2382
Email: tcoffman@gflenv.com

RENEWAL OPTION:

MARC/KCRPC and Participants do hereby accept your offer to renew the contract with the proposed pricing and terms dated Nov. 1, 2024. The renewal includes a five-year term beginning Jan. 1, 2026, at a monthly rate of \$17.50 per household, and ending Dec. 31, 2031. MARC/KCRPC and Participants reserve the right to negotiate an additional five-year renewal prior to the expiration date of Dec. 31, 2031.

GFL Environmental Inc. agrees to:

- A five-year agreement with the 2026 monthly rate of \$17.50 per household and annual increases not to exceed the Consumer Price Index (CPI) for Trash and Trash Collection percentage (capped at 3 percent). Existing carts will be used. GFL may request additional rate and price adjustments on a quarterly basis, based on unusual changes in the cost of operations, such as revised laws, ordinances or regulations, changes in location of disposal sites or changes in disposal charges; 30 percent increases in the price of #2 diesel fuel over any six-month rolling period; and similar operational changes.
- Existing 22-gallon recycling bins will continue to be collected, but bins will not be distributed at new addresses
- Collection of up to 10 bags, bundles and/or rigid containers of yard waste weekly
- Residents will be able to set out up to 20 items during spring and fall yard waste amnesty weeks
- GFL will provide each city up to \$1 per household annually to subsidize municipal waste diversion activities for communities that do not participate in the rebate program
- Provide collection of up to three (3) bulk items on one collection day each month
- Residents may contract separately for an extra trash cart at a rate of \$10 monthly
- Trash overage stickers will be available at a cost of \$2 each (\$10 per sheet of 5)
- Weekly trash and recycling collection from city facilities at no charge

- Roll off containers for leaf collection and storm debris will be hauled at \$295 plus composting facility disposal fee
- Roll off containers for solid waste will be billed \$295 per haul plus \$45 per ton
- White goods collected for \$60 each (must be certified free of CFCs)
- New Year's Day, Thanksgiving and Christmas holidays will be observed
- Yard Waste and Glass Diversion Rebate Program
GFL will provide credit on the December service invoice to a City engaged in programs that divert residential glass or yard waste from these collection streams. The credit will only be available if the program generates accurate actual weights or volumes of the diverted materials during the prior 12-month period from that City's residents.

Weight and volume reports shall be provided to GFL in a form meeting their approval and be certified as accurate by the City. The diversion volumes will be multiplied by the disposal rate GFL would have otherwise paid to dispose of those material weights or volumes to arrive at the annual credit to be applied to the December service invoice. As an example, leaves collected as part of a city administered curbside leaf collection program would be eligible for a credit at a rate of \$4.12 per cubic yard or \$156 per load. Another example, glass collected curbside by a contractor of the city would be eligible for the credit at a rate of \$28.50 per ton.

The credit will not be available to diversions through subscription services secured on an individual property basis (i.e. if a resident subscribed to a food compost service that is not under contract with the city) nor would storm debris disposal via city crews or a contractor be eligible for the credit.

- Service Delivery Systems Study
GFL agrees to participate in a comprehensive review and assessment of AI systems with on-board GPS, video, routing, and service delivery monitoring systems in concert with Fairway, Roeland Park and Westwood officials. The intent is to determine capabilities of such systems, their cost as well as to identify safety improvements, operational efficiency improvements, service-dependability improvements and cost reductions such systems could afford GFL the affected communities. All parties will conduct the study in good faith with a goal of completion by the end of 2026.

Each of the Participants will issue a sub-agreement and request the dual-obligee bond continuations, under the MARCs master agreement.
