RE: Town Hall/PD Generator Purchase

Dear Board of Trustees:

DPS has researched several different options for a permanent replacement of the failed Township Hall/PD generator. After receiving initial quotes and starting the process of the repair of the existing generator it was discovered that the engine has major damage and is in need of at least a rebuild. This is on top of the \$10k cost to replace the radiator and failed sensors. As the unit is very old, we would not recommend a rebuild as the preferred option.

We then turned our attention to replacement while we rented a unit for now. One of the quotes we received was for a fixed standby unit that would stay with the building. The rest of the quotes were trailer mounted portable units. Michigan Cat provided a quote to purchase the unit that we are currently renting. They would also credit 70% of the rental fees that we have paid toward the purchase.

The Michigan Cat unit runs perfectly and is very reasonably priced. They by far give us more portability along with having a sound attenuated enclosure. By far this is a good option for what we are paying for the unit verses purchasing a new generator. Due to the current supply chain demand, we would have to wait approximately 1 year for a new generator to be built. After we relocate to the new Township Hall, the unit's multi-port / multi-tap flexibility can be used for a lot of different events as well as at the smaller well houses.

I recommend that the Township Board approve the purchase the generator we are currently renting from Michigan Cat. This would be a general fund expenditure.

Please feel free to contact me if you have any questions.

Sincerely,

Aaron D. Potter

Director, Dept. of Public Services Charter Township of White Lake
