White Lake, MI 48383

**RE: Request to auction old Aspen Meadows Generator, DWRF 7479-01 Project**

Honorable Board of Trustees,

The new generator for the Aspen Meadows Iron Filtration Plant portion of the project has been delivered and installed. As such, we are now ready to remove the old generator from the area of the plant that will become the chemical room for orthophosphate corrosion control.

The old generator from the plant was installed with the original plant construction that went online in June, 2001. It is a Kohler Systems Generator Set Model 250REOZD, 400-amp output at 480V. As this generator is over 20 years old, the plan has been to auction this gen to offset some of the cost of the new plant construction. It would take a considerable cost to convert it to a trailer mount and would require a new enclosure. It would not be good practice to install a used gen of this age on critical infrastructure elsewhere.

**DPS requests the approval to auction the old generator in accordance with White Lake Township Administrative policy 4.5 (d) *Disposal of Fixed Assets* through the Clerk's office.**

Sincerely,

Aaron Potter  
Director, Department of Public Services  
Charter Township of White Lake
