262-473-1371

### BACKGROUND

(Enter the who, what when, where, why)

The construction of the PD Evidence/Training garage is scheduled to be completed by the end of October. The final known cost outside of the approved construction contract is the fiber run from the closest point of the existing fiber network (Wastewater digester building) to the garage. A reliable network connection is needed to access the PD records management system for property tracking as well as monitoring on-site cameras. The following quotes were obtained for providing materials and labor for boring and installing the fiber:

- 1) Technology Plus: \$15,272.00
- 2) Pieper Electric: \$19,556.00
- 3) WIN IT Services: \$23,650.00

### PREVIOUS ACTIONS – COMMITTEE RECOMMENDATIONS

(Dates, committees, action taken)

On 3/17/26 Council awarded the PD Evidence/Training Garage construction contract to Gilbank Construction. A fiber run connecting the building to the existing fiber network at the Wastewater digester building was not included in the construction contract. This is the final known additional cost outside of the construction contract.

### FINANCIAL IMPACT

(If none, state N/A)

\$15,272.00 - \$23,650.00 - The cost was accounted for in the initial CIP borrowing estimate related to the PD Evidence/Training garage.

### STAFF RECOMMENDATION

Staff recommend moving forward with the lowest cost option, Technology Plus, at a cost of \$15,272.00.
