## MINERAL & HARD DEPOSITS

### ENZ PERCUSSION MILLING HEAD CUTTER

The Enz Impact Milling Cutters range from 4 - 24 in. pipe diameters. In many cases, the use of a Percussion Milling Cutter is the only alternative to digging up pipes under foundations or roads.

Percussion Milling Cutters are specifically designed to remove stubborn deposits like concrete, injection cement, as well as calcareous and mineral deposits. They are equipped with tungsten carbide and or diamond tipped teeth. They work with a percussion system of 600 - 3000 impulses per minute and up to 12 tons of impact force.
