

Willow Park Police Department – Quarterly update
July 28, 2026

- Completed a complete upgrade of our radio system.
- Received new vehicles and installed new camera systems. All new patrol vehicles are now in service.
- Officers were fitted with new vests which have since been ordered.
- Interviewed multiple applicants and have now filled the majority of our open positions.

Over the last six months we have improved overall morale and made some necessary changes to how we operate day to day. Our policies are now easily accessible to officers with our PMAM software which also tracks whether they have reviewed them. We have also changed our processes to accurately issue and track our department issued equipment. We are in the process of changing our Records Management System as the software we have now is no longer a viable option. We are looking at multiple web-based systems which will improve officer efficiency. The last six months has been a period of transition for us and we have worked diligently to put our department in a better position moving forward.

STATS as of 01/01/2026 to 06/30/2026
