

Mayor Notes on Sewer Rates Discussion 3.16.2026

- Utility rates largely influenced by a 53.8% increase in construction inflation between 2020-2023.
- Based on the population growth adjustment and commercial and industrial growth projections over the 20 years, the project team determined that a number of the WWTP expansion projects can be delayed several years.
- Prefer Option 2 which build in a Utility Assistance Program in which Wilsonville Community Sharing will help implement.
 - **I like the comment:** The program will be periodically reviewed by City Council, which may consider expanding it to other City utilities in the future.
- The adopted rate tonight will go into effect April 1.
- **Resolution No. 3228 is Option 2.**
