Item Name MFT Westfield Project Bid Acceptance Committee or Board Board

BUDGET IMPACT

Amount:	TBD – Awaiting Bids	Budgeted:	Yes
List what fund:	MFT		

EXECUTIVE SUMMARY

Following significant storm events in mid-2024, a structural assessment determined that the culvert under Westfield Road was deteriorating, contributing to roadway settlement and lacking necessary side banks or guard rails. Fehr Graham, the Village Engineer, recommended full replacement with a precast concrete box culvert to meet IDOT standards and improve stormwater management.

The Village Board approved the engineering task order on August 21, 2024, and adopted Resolution 2025-03R on January 15, 2025, to formally approve the project as part of the 2025 MFT Program.

The project experienced delays due to required environmental studies. These studies have now been completed and cleared, and state approval is anticipated imminently. With regulatory clearance nearly finalized, the project is expected to move forward once bid approvals are received. Once bids are opened and reviewed, they will be brought before the Village Board for formal acceptance, enabling construction to proceed.
