

# Agenda Item Executive Summary

Item Name Clayton Court Water Main Looping Bid Acceptance Committee or Board Village Board

## BUDGET IMPACT

Amount:	\$48,500	Budgeted:	Yes
List what fund:	51-44-534		

## EXECUTIVE SUMMARY

The Clayton Court Water Main Looping Project, originally approved in the 2024 Operations & Maintenance Budget, aims to enhance water distribution and fire protection in the Village of Winnebago. Fehr Graham has completed the project design, which will eliminate three dead-end water mains, replace two fire hydrants, add two new hydrants, and significantly improve fire flow capacity. This project is expected to triple fire flow rates and ensure compliance with IEPA minimum residual water pressure requirements.

To proceed, an easement expansion is needed due to the current width limitations. The Village Attorney is working with the Village Engineer to finalize the necessary documentation before the project can advance to bidding.

This project is vital for improving water pressure, reliability, and fire protection for the affected area. Once the easement is secured, the project will move forward to the bidding phase and be presented to the board for bid acceptance.
