

Wylie City Council

AGENDA REPORT

Department: Public Works/Engineering
Prepared By: Glenna Hayes

Account Code: 611-5722-56570

Subject

Consider, and act upon, Modification No. 1 to PSPO #W2020-94-E Wylie Wastewater Treatment Plant Decommissioning Study in the amount of \$79,550.00 for engineering services, bid documents and construction oversight for the demolition of the existing structures; and authorizing the Interim City Manager to sign any and all necessary documents.

Recommendation

Motion to approve Item as presented.

Discussion

In August of 2020, the City Council awarded a professional services contract (PSPO #W2020-94-E) to Freese & Nichols, Inc. for the decommissioning of the Wylie Wastewater Treatment Plan on Alanis Drive. Following the official decommissioning with the Texas Commission on Environmental Quality (TCEQ), several plant demolition options were presented to City Council in a short series of workshops.

Council has provided direction to staff to proceed with the demolition of the existing wastewater treatment structure to allow for redevelopment of the property. Freese & Nichols, Inc. has submitted Modification No. 1 to PSPO #W2020-94-E to coordinate all necessary requirements and documents with NTMWD. The scope of the work will include demolition plans, relocation of the chemical injection system and installation of an interceptor; all of which will be incorporated into a design specification and single construction package.

Staff recommends the approval of Modification No. 1 with Freese & Nichols, Inc. in the amount of \$79,550.00.

Financial Summary/Strategic Goals
