## AGENDA REPORT

Department: Animal Services

Account Code: \_\_\_\_\_

Prepared By: Chris Marren

### Subject

2025 yearly statistical information for shelter operations.

### Recommendation

Consider, and place on file the 2025 yearly statistical information for shelter operations.

### Discussion

The yearly statistical information report consists of three data groups within the specified reportable timeframe: impounded animals, disposition method of animals, and euthanasia reasons. Four columns within data groups reflect three species: dogs, cats, and others. The fourth column, the total, includes the sum of all species.

The TNR program report reflects services performed by WAS through caretaker requests during the specified quarterly report timeframe.
