Discussion

The Municipal Walking Trails, Phase 2 Selection Panel has made their recommendations for the final artist(s) for Site 1 and Site 2. The themes will depict the rich history of the Blackland Prairie which the Municipal Complex and trails are part of. The art will provide a history over the past 15,000 years and include the Native Americans who camped and hunted in the area and animals that still habitat in the area as well as bison and other animals that no longer roam this area. It will also include the natural prairie grasses and flowers that grow in this area.

Staff is recommending approval of the recommendations or another consideration if the board wishes.
