

# Animal Shelter Advisory Board

## **AGENDA REPORT**

Department: Animal Services  
Prepared By: Shelia Patton

Account Code: \_\_\_\_\_

### Subject

2025 second-quarter statistical information for shelter operations

### Recommendation

Motion to approve as presented..

### Discussion

The statistical information report consists of three data groups within the specified reportable timeframe: impounded animals, disposition method of animals, and euthanasia reasons. Four columns within data groups reflect three species: dogs, cats, and others. The fourth column, the total, includes the sum of all species.

The TNR program report reflects services performed by WAS through caretaker requests during the specified report timeframe.

The provided TNR district map depicts all animals WAS serviced through caretaker requests during this program's inception in September 2022. District numbers are adjusted quarterly to reflect feral felines completing the TNR program vetting requirements through WAS and returned to the caretaker, as well as reports from caretakers of deceased feral felines who have completed the TNR program through WAS.
