

PROGRESS REPORT

CLIENT ORGANIZATION: City of Youngsville
CLINET REPRESENTATIVE: Clint Simoneaux, P.E.
REPORT DATE: March 1, 2023 through March 31, 2023

E. MILTON AVE. CORRIDOR

Neel Schaffer continued utility coordination with utility owners within the project limits. Neel Schaffer has met with Entergy, SLEMCO, and the City of Youngsville to discuss potential conflicts with the proposed roadway and drainage design. Neel Schaffer has coordinated with Cox Communications, LUS Fiber, AT&T, Uniti Fiber, and Centerpoint Energy to get utility lines marked by LA ONE Call. Most utility lines have been marked and captured by the surveyor. There are a few gaps in information that have been identified and Neel Schaffer will continue to work with the utility companies to get these areas marked. Once all utility information is captured by the surveyor this information will allow for Neel Schaffer to proceed with final plans.

LA 89 @ CHEMIN METAIRIE PKWY

Neel Schaffer has completed 60% preliminary plans for the proposed roadway and drainage improvements. Neel Schaffer began coordinating with utility owners to ensure that all utilities are captured and incorporated into the design file. Neel Schaffer has engaged a geotechnical engineer to determine the pavement section required.

VELASCO XING EXTENSION

Neel Schaffer has put together a conceptual layout for the proposed roadway extension. Neel Schaffer has submitted a cost proposal for the topographic survey and engineering design.
