

DSA PROJECT STATUS
CITY OF YOUNGSVILLE
March 2023

1. **Wastewater Treatment Plant (WWTP) Upgrade:** The Louisiana Department of Environmental Quality State Revolving Fund (DEQ SRF) Loan for funding of the proposed wastewater treatment plant upgrade is in place. The City was also successful in obtaining \$5 million in Water Sector Program grant funding. The project is being permitted through the Louisiana Department of Health and the Louisiana Department of Environmental Quality.
2. **Sanitary Sewer Collector Pump Stations and Upgrades:** This entails the upgrading Pump Station #4 on Iberia Street, which has obsolete equipment and is located in the floodway. This project was included in the \$5 million WSP funding. We are completing the design and permitting of this project.
3. **Downtown Streetscape:** The contractor is completing the punch list items for this project.
4. **New Water Treatment Plant, Elevated Storage Tank, and Water Line Interconnections:** The Louisiana Department of Health State Revolving Fund Loan and a \$5 million ARPA Water Sector Program (WSP) grant are funding the treatment plant, elevated storage tank, and water system interconnections. The contractor is performing the pump test for the new Water Well No. 9, after which the pump and motor can be ordered. The plans for the new water treatment plant have received LDH, Fire Marshall, and City permitting. We are working on outfall permitting. The Water Sector Program must perform a rate study prior to the City bidding these projects; the City is awaiting that rate study. Plans for the elevated storage tank to be constructed at the City's property at 440 Détente Road have received LDH permit approval; we are addressing LDH comments for permitting of the plans for water line interconnections throughout the City.
